Secure Email Threat Defense

Advanced threat detection capabilities to protect against the most advanced and pervasive threats

Moving email to the cloud provides convenience and scalability, but it could also bring an increased risk of account takeovers, business email compromise and malware infection. You need a cloud-focused email security solution that fortifies your Microsoft 365 environment, is simple to deploy, and fully protects your organization.

Cisco Secure Email Threat Defense provides the most comprehensive protection against damaging and costly email threats that compromise your organization's brand and operations. Its advanced threat detection capabilities uncover known, emerging and targeted threats. Expand the scope of your defenses to identify malicious techniques, gain context for specific business risks, detect dangerous threats, and rapidly search for and remediate threats.

Benefits

- Uncover known, emerging and targeted threats
 with advanced threat detection capabilities
- Identify malicious techniques and gain context for specific business risks
- Rapidly search for dangerous threats and remediate them in real time
- Utilize searchable threat telemetry to categorize threats and understand which parts of your organization are most vulnerable to attack

cisco SECURE

A critical component of your Extended Detection and Response Strategy

As an important part of a larger Extended Detection and Response strategy, Secure Email defends against critical threats with industry-leading threat intelligence, advanced threat detection capabilities and vital telemetry that informs strategic threat protection. In combination with numerous third-party integration partners and the larger Cisco Secure portfolio of products, this provides the visibility, efficiency, simplicity and telemetry that empower your team to act quickly. Orchestrating workflows in SecureX simplifies processes and reduces the burden on your team and builds efficiencies so you can focus on more strategic initiatives.

Secure Email Threat Defense provides expansive email security to protect your employees and organization, while empowering your security response.
