15-Day **Agentic AI** Accelerator

From Concept to Capability: Revolutionise Your Business with Agentic AI & Microsoft Copilot

Led by AI Business Consultant and Microsoft 365 Ai Developers, this 15-day end to end experience takes concept to ability and gets into the nitty gritty of agentic AI adoption combining art of the possible, education, technical deep dives, and hands-on, real-life development to deliver a working functional prototype using Microsoft AI technologies into Microsoft 365.

Inspire & Identify

What's Included
1. Overview of latest approach to Agentic AI including Agent365, Copilot Studio, AI Foundry, Work IQ.
2. Industry examples & success stories
3. Workshop to identify and prioritise use cases

Outcomes
1. Understanding of Agentic AI and practical examples.
2. Prioritised list of use cases with ROI aligned to business goals

Design

What's Included
1. Architecture design for selected use case
2. Microsoft AI Platform setup & integration points
3. Copilot Studio agent design & orchestration
4. Security, compliance, & governance considerations

Outcomes
1. Tailored technical blueprint for prototypes
2. Configured environment ready for development and POCs.

Develop

What's Included
1. Development of a functional prototype using Copilot Studio and Power Platform
2. Integration with Microsoft 365 apps and data sources
3. Testing & refinement based on feedback

Outcomes
1. Working prototype demonstrating real-world scenario
2. User and Admin Guides and best practice guides to keep you going.

Deliver

What's Included
1. Final demo to stakeholders
2. Walkthrough of technical documentation
3. Recommendations for scaling & next steps.

Outcomes
1. Stakeholder buy-in & clarity on adoption roadmap.
2. Working agentic agent to kick start internal development

What to Expect

Expert-Led Guidance

Hands-on support from specialists, including AI Foundry and Copilot Studio.

Tailored Use Cases

Collaborative workshops to prioritise high-impact business scenarios for Agentic AI adoption.

Functional Prototypes

Development of a working agent integrated with M365 apps and data sources.

Actionable Roadmap

Detailed adoption plan with technical documentation and next steps for scaling AI out.

Beyond Expectations

CISILION

Examples of Agentic AI Agents we can build together

Agent for Human Resources
Take the weight of your HR teams by enabling your employees to get answers to their questions 24/7 via a self-service platform. Integrated with your HR System* to get leave information and more.

Agent for Information technology
Take the weight off your IT teams and enable your employee to get answers to their questions 24/7 from a self-service platform. Allow them to raise and manage their IT requests with your ITSM*.

Agent for Financial Reporting
Is month end or year end stressful for your Finance Teams? This agent will help them gather information, cross-check reports and data to increase their efficiency when analysing and comparing datasets for your financial month and year ends.

Investment Summary Agent
Do your teams spend time pulling together fund reports for investors? This agent will dramatically reduce the time to deliver investment reports and improve the consistency and clarity of the report. Reports that used to take 2 days now take less than an hour*.

Report Assessment Agent
Do you currently have to assess reports, documents, articles, video, audio and make an assessment? Using an Agent you can automate these traditional labour -intensive processes.

Decision Making Agents
Do you have processes that require decisions to be made from various information sources such as documents, information systems and you write up a report to form a decision? Using an Agent these processes can be automated using reasoning models to create a first draft and reduce the load on your team.

Why Cisilion?

1. **Copilot Jumpstart Partn**er: Recognised by Microsoft for expertise in accelerating Copilot adoption.
2. **Specialist Adoption Team**: Dedicated team ensures your people embrace real business change
3. **End to End Support:** From strategy to workshops to technical enablement and ongoing advisory.
