

Microsoft 365 Copilot | Advisory Workshop

Duration: Two hours

Format: Virtual, hybrid, or in-person

Cost: Free

Designed to provide awareness and readiness planning to ensure your organisation is informed, aligned and ready for Copilot when it becomes available.

With the upcoming availability of Microsoft 365 Copilot, organisations are starting to realise the benefits that Generative AI powered tools will have on productivity and efficiency.

Copilot will help your employees stay in the focus of work, assisting with complex and time-consuming tasks and freeing up time to unleash creativity, unlock productivity, and level-up skills and ability around the tools your employees already use.

Preparing for Copilot

Your people, managers, and leadership team will want to know more about what needs to be completed to be ready for Copilot. Cisilion's workshop focuses on the questions you want answered – What are the ethical considerations? How do we ensure our security is copilot ready? What data protection and access controls are there? What will be the licensing costs and availability? How do we prepare our employees for the impact and changes that will be coming?

Copilot Workshop Deliverables

Cisilion provide an interactive and informative readiness workshop for your key business stakeholders. Delivered as a presentation, demo, and round-table discussion, we will walk you through what Copilot is, the prerequisites, and technical readiness needed to ensure you are Copilot ready. It will also help you identify the people and teams within your organisation that will benefit the most.

Cisilion shall cover the following key areas (these can be modified per organisation):

- Overview and latest updates around Microsoft 365 Copilot.
- How Copilot works: Key features and the benefits for employees
- Organisational Readiness: Microsoft 365 adoption.
- Organisational Readiness: Security and data readiness.
- Organisational Readiness: Use cases, awareness, training, and employee communication.
- Organisational Readiness: Semantic Index for Copilot.
- Financial Readiness
- Value Recognition

Who Should Attend

The recommended audience includes Business Leaders, Head of Departments, HR, and IT
