

Microsoft 365 Security Assessment

Our **Microsoft 365 Security Assessment** will help your organisation align to security best practices to ensure that your security posture is strong and resilient against cyber attacks

Our security consultants will deliver an in depth assessment of your M365 tenant, Cisilion will work side-by-side with you to develop a security strategy to maximise your Microsoft 365 investment and strengthen your organisation's security.

Our **Microsoft 365 Security Assessment** offering includes:

- **Full Report** The Microsoft 365 assessment covers all areas of your organisation's Microsoft Tenant including Azure AD, MS Defender, Exchange Online, Teams, SharePoint and OneDrive testing over 190 different settings.
- **Identify and Mitigate Vulnerabilities** The assessment will identify potential security threats and vulnerabilities, allowing the organization to take proactive measures to mitigate these threats.
- **Improve Security Posture:** Cisilion will provide a clear view of the organization's overall security posture, including insights into how well security policies and procedures are being implemented.
