

## Cloud Managed Endpoint 5 Day Proof of Concept

The outlook for technology leaders today is constantly changing, as evidenced by the recent changes in hybrid work. As such, IT are looking for a cloud-based device management solution that helps them build resilience in the face of constant change.

Our Cloud Managed Endpoint Pilot is designed to help organisations recognise the value of cloud-based endpoint management to securely provision, configure, manage and support employees' devices all the time – whatever the device, and wherever they live or work.

1. **Envisioning workshop** to showcase and demo the operational, financial and user benefits of using Cloud Management.
2. **Deployment Strategy** to look at how devices are deployed, configured and managed today and how this translated to a cloud managed environment.
3. **Pilot deployment and user feedback** which defines the pilot group, technical and user acceptance criteria and scope
4. **Production Readiness** which includes feedback from users, IT and operations and scoping for future organisational rollout

### Why use our Service?

#### Tried & Tested

We've helped hundreds of customers streamline and simplify device management

#### Right First Time

Our proven methodology means your deployment just works and is easy to support.

#### Expert Led

Our consultants help answer questions and bust any myths about cloud management

#### The Right Path

We help determine the right approach for your organisation to get to cloud management.

#### Improved Visibility

Leverage cloud analytics to report and manage device and app performance

#### Reduced Administration

Streamline device provisioning, deployment, updates and management.

### 5-Day Cloud Managed Endpoint Pilot

# Benefits of Cloud Management

## Reduced Complexity

Industry-leading identity protection, security and threat protection from chip to cloud.

## Cloud First

Leverage device caching and cloud to simplify deployment and updates from anywhere.

## Carbon Friendly

Reduce power and CO2 by reducing infrastructure across your data centres and offices

## Cloud Intelligence

Leverage Cloud intelligence and signals to help prioritise and focus support efforts

## Zero Touch Deployment

Enables devices to be provisioned, retired, reset and updated without IT intervention.

## Supports BYOD

Support flexible device procurement programmes such as BYOD and CYOD

# Benefits of Cloud Management

## Why Cisilion?

We are an award-winning, global service enablement and Managed Service Provider.

Our mission is to inspire intelligent change by delivering next generation IT infrastructure and Cloud Services.
