CISO ONLINE
CYBER SECURITY UPLIFT & AWARENESS

OUR PURPOSE: CYBER SOLUTIONS FOR SMB

The Australian Cyber Security Centre (ACSC) reports a 23% increase in cybercrime last year, including identity fraud, online banking fraud, and business email compromise. Despite the increase in cyber incidents, nearly half of Australian Small and Medium-sized Businesses (SMBs) allocate less than $500 annually to cyber security.

Recognising the budget constraints faced by SMBs, Our partnership with Microsoft as a Cloud Solution Provider (CSP), enables us to offer advanced and scalable cloud-based cyber security solutions and ongoing operations, so SMBs can focus on their core business rather than cyber security challenges.

CISO OPERATION - CYBER ESSENTIALS

Reactive response to security events

Ongoing vulnerability remediation and monthly response to security events (threathunting) - Standard

Ongoing reactive response to security events in monthly basis is a critical process, involving the identification and resolution of security vulnerabilities within your M365 environment.

How is this achieved?

- Identify, assess, remediate, and track all your biggest vulnerabilities across your most critical M365 assets, all in a single solution - Standard.
- Monthly reactive response and report to security events

Ongoing Security Report - monthly

Ongoing Secure Score monitoring and improvement

Ongoing operation leveraging M365 portal capabilities to maintain and improve your secure score. In addition, a monthly Ongoing Security Report is essential for continuous monitoring of emerging threats, proactive risk management, and ensuring regulatory compliance.

How is this achieved?

- Ongoing Secure Score monitoring and improvement with adaptive
- Monthly security report Leveraging M365 portal capabilities to maintain and improve your security posture.

Ongoing Security Report - monthly

Ongoing log collection and standard monthly security reports

Ongoing log collection and providing monthly advanced security reports is required to detect and mitigate security incidents, enhancing overall cybersecurity resilience.

How is this achieved?

- M365 unified log collection and centeralised management of audit logs, which includes collecting and processing logs from various sources. (30 to 90 days)

CISO ONLINE
CYBER SECURITY UPLIFT & AWARENESS

Microsoft
Cloud Solution Provider

CISO OPERATION - CYBER ESSENTIALS

CISO as a Service Advisory

CISOaaS advisory and ongoing review of the policies - Monthly

Cyber security policies defined in your M365 environment are safeguarding your data and systems from cyber threats. They provide a strategic framework for protecting sensitive information, ensuring operational continuity, maintaining trust, and complying with legal standards. Updating M365 policies is critical for your security posture and overall success.

How is this achieved?

- Ongoing review of M365 policies by leveraging our CISO as a Service (CISOaaS) capabilities and experience - Quarterly

Fine-Tuning Identity Protection Policies

Ongoing support for provisioning new users/licenses and updating user credentials

Cyber Security starts with protecting your identity. Ongoing protection of your business identity by provisioning new users/licenses and updating user credentials

How is this achieved?

- Ongoing Multi-Factor Authentication (MFA) support
- Updating Conditional Access Policies
- New users and licenses provisioning

Fine-Tuning Email Protection Policies

Fine-tuning standard email protection policies

Fine-tuning standard email protection policies against the latest threat tactics such as phishing attacks, malware threats, Business Email Compromise (BEC) scams is crucial for maintaining business continuity, and preserving reputation and trust in today's digital environment.

How is this achieved?

- Updating and fine-tuning standard Emial protection policies

CISO ONLINE
CYBER SECURITY UPLIFT & AWARENESS

Microsoft
Cloud Solution Provider

CISO OPERATION - CYBER ESSENTIALS

Fine-Tuning Device Protection Policies

Fine-tuning policies for M365 Apps protection on Mobile Devices (iOS, Android)

Updating M365 Apps protection policies for new devices such as laptops, smartphones and tablets is essential for safeguarding Apps and protection for company data on any device.

How is this achieved?

- Remotely wipe lost or stolen devices (PC and Laptops)
- Fine-tuning policies, supervise and manage M365 apps (Outlook, Teams, OneDrive) on any devices

Updating Security Awareness training plans

Human error is how most organisations get compromised and hackers are always looking for new ways to exploit vulnerabilities and this include humans! Updating Security Awareness training plans are required to keep your employees educated on the latest tactics.

How is this achieved?

- Ongoing Security Awareness training plans
