CitiusTech

CitiusTech Gen AI Smart Search solution

CitiusTech's 'Gen AI Smart Search solution' empowers patients to find relevant information about a condition or ailment from their providers' website. The solution collates relevant information from multiple sources (public websites and intranet documents) to provide the latest available details to the patient in a human-like summary.

Patient Value Proposition:

- **Round-the-clock query assistance:** Empowers patients with responses from trusted sources whenever they need them. This also helps reduce dependency on doctors.
- **Personalized responses:** Patients can receive recommendations based on their search history on health outcomes and preferences

Physician Value Proposition:

- **Reduce dependency for patient queries:** Physicians can free up time from answering queries to proactively engaging with patients about their health condition
