

CitiusTech: PERFORM+ Quality

Enhance quality performance across patient and member populations

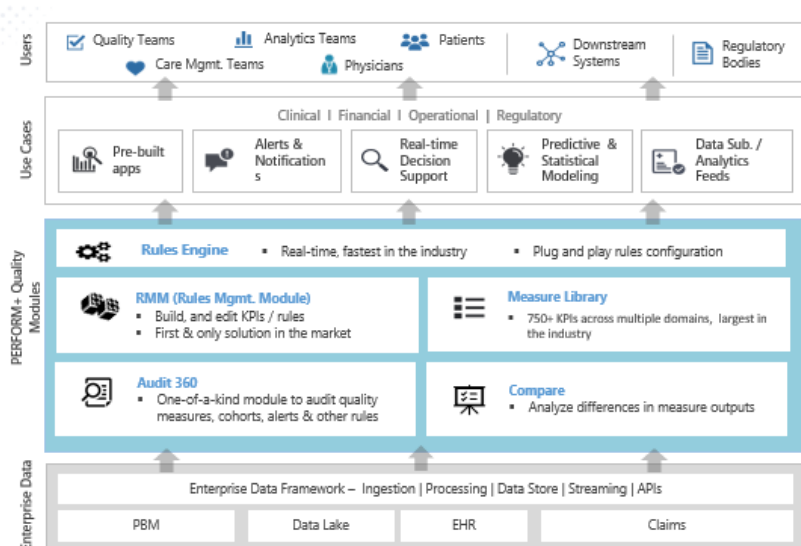

PERFORM+ Quality is part of CitiusTech’s PERFORM+ suite of products with a focus on enhancing quality performance across the enterprise, with over 750 KPIs across clinical, financial and operational domains. It offers an integrated, sustainable and scalable approach to analytics and reporting, to effectively meet value-based care needs.

To make the transition to proactive care, Health plans and providers need to closely monitor patient & member populations, close gaps-in-care and manage costs. PERFORM+ Quality can help identify areas of improvement and enable proactive oversight to safeguard revenues and avoid penalties.

PERFORM+ Quality can help in the following ways:

- Comprehensive real-time auditing across clinical measures, cohorts, clinical alerts
- Build & manage measures to comply with changing quality programs
- Ensure accuracy of submissions and traceability for audits
- Largest library of pre-built KPIs with clinical, financial, operational and data quality rules

PERFORM+ Quality: Solution Overview

Key Features

Fastest Rules Engine for Real-time and Batch processing: Highly configurable rules engine for quick customization and go-live to drive quality measures and KPIs. Scalable processing to match business needs

Flexible Rules Management Module: First-in-industry module to simplify defining, building and managing rules. Up to 40% faster go-live for new rules. 60% improvement in efficiency

End-to-end Auditability: Comprehensive, real-time audit reports across clinical measures, cohorts, clinical alerts and other rules. Single Source of Truth for CQMs and CDS rules

Largest CQM library: Library with 750+ CQMs incl. MIPS, ACO, HEDIS®, HCC, QCDR, Medicaid Adult and ChildCare, CMS Star, PI eCQMs

Key Highlights

- **VBP & Population Health:** Population Health Management, Utilization, Risk Analysis, Contract Management, Cost Analysis, Referral & Leakage
- **Provider Engagement Care Coordination:** Campaign Management, Closing Gaps, Quality, Rules Management, Care Management
- **Quality & Cost Analytics:** Cost analysis, RCM, protocol referral & leakage, audits

Organizational Outcomes

- Quality Improvement
- Patient Outcomes
- Business Workflows
- Compliance

Key Use Cases:

- Care reminders, Rx reminders
- 360-degree view of patients across care systems
- Behavioral Health, Care coordination & Management
