ARE YOUR CLAIMS STUCK IN THE SLOW LANE?

Processing auto claims can often be a slow and painful process. For carriers, resolution can take days, require multiple handoffs, and cost hundreds of dollars. For insureds, it's the frustration of waiting for answers and getting back on the road. Surely there must be a better way.

CLAIM THE FUTURE WITH CLAIM GENIUS

Claim Genius' vision is to significantly reduce costly delays by bringing art and science together, and making 'touchless claims a reality'. How do we do it?

- Our GeniusCLAIM suite uses advanced AI technology to provide carriers with instant and accurate FNOL and damage estimates based on damage photos and videos uploaded from our mobile GeniusAPP
- This technology allows carriers to make instant decisions on the reparability of vehicles, getting customers back on the road faster and saving you hundreds of dollars per claim
- With powerful features including damage severity and parts identification, automated fraud detection, video upload support, and more, Claim Genius can greatly increase the effectiveness of your claims process
- Our expert team and full suite of APIs help you easily integrate and customize Claim Genius into your firm's unique workflow

Thus, providing carriers with a highly marketable service to attract new customers!
