

Endpoint Manager

Manage and protect your devices, apps and users

Keep your data secure and optimise operational management

The move to hybrid work, the increasing use of SaaS applications, BYOD and a multitude of devices at numerous remote locations has led to a broad attack surface and an increasing pressure on IT to manage devices, protect business data and ensure compliance. Protecting such systems in a modern workplace requires a more fluid approach to endpoint management. Endpoint management allows IT administrators to remotely manage and protect devices at scale, and with ease.

Leverage Claranet's team of expert engineers to design, implement and support an endpoint management solution, without having to build the inhouse skills and knowledge. As Microsoft Gold Partners, Claranet can help you to unlock the capabilities of Microsoft Endpoint Manager to get started quickly, and in line with best practice.

Why choose Claranet for Endpoint Manager?

- 20+ years fully accredited Microsoft Gold Partner
- A holistic approach - with technical expertise across modern workplace, secure networks, cloud and cybersecurity
- Feature in Gartner Magic Quadrant for Modern Workplace and Managed Services Europe
- Get there faster! Use our expertise without having to build the inhouse skills and knowledge yourself

Key features of Microsoft Endpoint Manager

Unified management

Apps, device controls, and insights are brought together in one cloud-based endpoint management platform.

Built-in protection

IT is empowered to apply the controls needed for a Zero Trust security model and protect their digital estate without getting in the way of user productivity.

Comprehensive scalability

Intuitive management controls, workflows, and analytics ensure healthy and compliant device and application deployments.

How we work with you

We love building long-term relationships with our customers, that continually deliver value. Our focus is on your success, providing the right services at the right time, to grow and compete at your best. We listen. We take the time to understand our customers, their business, and where they want to be; we then get them there faster and with less risk than thought possible. By taking Endpoint Manager from Claranet we will support you through the stages below:

Consult

We will work with you understand your current business challenges, goals and objectives to determine whether an endpoint management solution is right for your organisation. We'll get to know how your business works, who your users are and what how they interact with devices.

Design

Our Architects will use the understanding of your organisation to create an Endpoint Management blueprint which is aligned to your business, users and devices. They'll produce a detailed design and action plan for rolling out Microsoft Endpoint Manager across your organisation.

Build

This phase of engagement is all about getting you up-and-running with Microsoft Endpoint Manager. We will project manage the build and deployment of the service so that it meets your business needs.

Support

As your expert Microsoft partner, our staff are available to provide support, remediate and escalate any platforms issues to Microsoft if needed.

How you will benefit from Endpoint Manager

Improved Security

Reduce the burden of managing multiple tools and improve security posture whilst lowering the risk of threats

Maximised Investment

Retire older solutions and make more out of the Microsoft 365 subscriptions you already have

Enhanced End User Experience

Improve flexibility and productivity by supporting a diverse bring-your-own devices (BYOD) ecosystem

Redeployed IT Time

Enable faster and smoother remote device provisioning, deployment and upgrades
