### Secure & Compliant Cloud Infrastructure

Automated security. Intelligent compliance.

Healthcare's digital transformation is only possible when tethered to a robust compliance program. Innovating at scale, while staying on top of an ever-evolving regulatory landscape, requires cloud and healthcare expertise, automation, vigilance and reporting. We'll help establish your secure, compliant cloud initiative — and keep it that way.

✔ **Real-Time Visualization**
Visualize and automatically remediate vulnerabilities.

✔ **Controls Mapped to Privacy Regulations**
Prescriptive compliance with compliance frameworks like HIPAA and GDPR.

✔ **Audit-Ready Compliance Trending & Reports**
Demonstrate and prove your commitment to continuous compliance.

✔ **Automated Safeguards / Enforcement**
Constant identification and remediation of non compliant actions mitigates vulnerability.

✔ **Continuous Security & Compliance / Remediation**
Compliance experts enhance your automation with terraform scripts.

✔ **PHI/PII-Awareness**
Our platform optimizes and configures your cloud services to securely handle PHI.

Security Insights & Visualization

Complex risk identification — solved

It's a highly complex step in sensitive data management to identify the location of your PHI / PII and – even more so – who can access it. In healthcare, inefficiency and delay can impact patient care, not just your bottom line. So ClearDATA has developed a powerful set of solutions inside the CyberHealth platform to solve for those challenges.

✓ **Identity Access Management Visualization**
Interactive tooling provides insight into the scope of permissions risk.

✓ **Sensitive Data Discovery and Inventory**
Automation locates and quantifies PHI within cloud storage buckets or Kubernetes environments.

Assessments & Risk Management

Tackle risk with automation & prioritization

CyberHealth platform automation yields actionable, quantifiable insights, so you can implement a strategic roadmap for risk mitigation and compliance — without the headache. It provides:

✓ **ePHI Inventory with Automated Discovery**
Detect and locate PHI within storage buckets or containers.

✓ **Security Risk Assessment Solution**
Our intuitive SaaS tool augments our HIPAA SRA service, reviewing physical, administrative and technical controls.

✓ **Risk Management Dashboard**
Proprietary risk algorithms and reporting provide a deep, quantifiable assessment of your environment's risk profile.

CLEARDATA™

Harness the power of healthcare's largest managed cloud and secure your sensitive health data from design time through run time. Transform and scale with confidence.
