

Maximum Insights. Minimal Effort.

Lots of tools have extensive hardware or software pre-requisites and an extensive onboarding process that make "free trials" difficult to begin. We're different. We make it so easy that it would be a waste for you not to try us out in your full environment. **Some companies have saved \$500k just from insights gained during their free trial!**

## HOW IT WORKS

Visual One Intelligence's™ set-up can be done in 2 hours or less and only requires:

- 2 CPU, 8GB Memory, 20GB Free Disk Space
- Windows 7, 10, or Windows Server 2012 R2 or later
- Browser that supports HTML5 (Edge, Chrome, Firefox)
- Windows PowerShell 5.1 or later
- Python 3.10 or later
- CLI or REST API for data collection process

## POC CLIENT INSIGHTS

### Reclaimed Space: Postpone Your Next Storage Purchase

By identifying "orphaned" space, fragmented storage, and other capacity reclamation opportunities, clients can often reclaim up to 10% or more of their existing capacity.

### Optimized Spending: Tackle Runaway Cloud & Storage Costs

Use instant capacity planning to right-size workloads and SLAs. One company avoided a six-figure storage purchase thanks to insights from the first week of their free trial.

### Health Alerts: Identify Issues Before an Outage

Within hours of starting their trial, one company found a device with unusually high latency, identified the root cause, and fixed it before a problem occurred.

### Get It Right the First Time: Optimize Migrations & Compare Costs

Compare workload costs in the cloud vs. on-prem and prepare for migrations. One company avoided a migration that would have failed due to lack of capacity on new arrays - something they only realized with a trial of Visual Storage Intelligence.
