Redspin Ready
Managed Azure GCC High Services & More

Purpose Built to Meet CMMC Level 2 Certification and Ongoing Managed Compliance and Protection of CUI for Defense Contractors

Redspin—the first authorized C3PAO and Microsoft partner. We lead the industry in the most CMMC Assessments and have designed our managed services to deliver everything needed for defense contractors to meet their CMMC requirements within Microsoft Azure GCC or GCC High.

Our managed cloud and service solution, Redspin Ready, helps defense contractors ensure they have the means and support to tackle CMMC now, while also providing options to optimize and scope their environments and services to streamline compliance.

Before jumping to Microsoft licensing and enclave information, we spend time reviewing the types of data, such as Controlled Unclassified Information (CUI), ITAR requirements, and other Federal Contract Information (FCI), and the data flows your business needs to ensure the best outcomes and operational efficiency. This level of detail provides CUI discovery and documentation that informs our team on how to design, implement, and ultimately provide the managed services in Microsoft Azure to defend and protect your CUI.

Feature Area	Redspin Capabilities
Cloud Infrastructure & Design	Flexible Azure-based architectural support Cloud Design & Resource Optimization Licensing strategy
Security & Compliance	Implementation (covering NIST, CMMC, & Azure best practices) Access and Co-Management Compliance Management Vulnerability and Patch Management CUI and Communication Encryption
Operational Excellence	24/7 Operations Management Real-Time Cloud Spend Views Managed Detection and Response Log Management Configuration and Change Management
Client Support	Value Action Plans for Security Awareness Training and other actions to support the spectrum of NIST 800-171 Domains and Requirements Expert-led advisory sessions

Why Redspin?

CMMC Focused + Azure Aligned

Purpose-built to support contractors using Microsoft Azure and M365 in GCC or GCC High Environments

One of the first C3PAOs

Proven CMMC assessors with deep regulatory and DoD knowledge, and broad experience in NIST 800-171 Assessments

Integrated Approach

Professional services to support implementation, documentation, and assessment prep, then seamless handoff to managed Azure services, and compliance maintenance

Redspin Ready is an integration with Microsoft GovCloud Managed Services and C3PAO Consulting to address all areas of CMMC and NIST 800-171 from an industry leader.

From cloud architecture and M365 services, we listen to you and provide the deployment and configuration options to minimize CMMC scope and costs. Let us help you determine if you need GCC or GCC High, and migration services from Microsoft Commercial to these environments..

Minimize CMMC Scope & Secure Data

Accelerate Compliance, & Continuous Expertise

Engaging with Redspin not only accelerates your readiness but also ensures the best coverage for the 14 domains required for CMMC compliance. Ask us to review the details of Inheritance and what is commonly misunderstood within CMMC Clouds.

Our approach mitigates risks and optimizes cost, making it easier to achieve compliance certifications and enhance your cybersecurity posture. Our commitment to security and compliance allows you to focus on your core operations while we handle the complexities of CMMC-aligned cloud and security management.

Streamline Compliance

Redspin helps move federal contractors to a more secure, compliant, and resilient state to help protect the Defense Industrial Base. As the first Authorized CMMC 3rd Party Assessment Organization (C3PAO), Redspin provides federal contractors with CMMC assessment, training, consulting, managed cloud, managed security, and ongoing compliance maintenance services designed to enable them to meet and comply with CMMC requirements.
