

Cloud Security Assessment with Cloud Intel

Protect Your Cloud Environment with Microsoft 365 Security Tools

In light of hybrid working practices and digital transformations, online security threats have steadily increased, and many businesses are almost inevitably under constant attack.

In case you're a bit dazed by terms like SIEM, MDR, or XDR and you're unsure where to start or how to prioritize your efforts in cloud security, Cloud Intel can help guide you in the right direction. In a world where the volume of data and alerts continues to grow, IT budgets are shrinking, and there's a need to protect vulnerable legacy systems, Cloud Intel empowers you to reach your broader security goals. It enables you to identify current and real threats using Microsoft 365 tools and Azure security capabilities.

As part of our assessment, Cloud Intel works with you to enhance your cybersecurity strategy. It analyses cyberattack threats targeting your organization, offers actionable recommendations for threat mitigation, assesses your IT and security priorities, provides insights into Microsoft's comprehensive security approach, demonstrates integrated security solutions, and helps you understand the benefits and capabilities of Microsoft tools and Azure security services. We also assist in selecting the most suitable Microsoft tool to defend against threats based on your specific needs.

The products that we work with you on include:

Microsoft Sentinel, Microsoft 365 Defender, Azure Active Directory Identity Protection, Microsoft Defender for Office 365, Microsoft Defender for Cloud Apps, and Microsoft Purview

Key Deliverables

- ✓ Discovery
- ✓ Assessment
- ✓ Overview of Cloud Apps in Use
- ✓ Business Value Analysis
- ✓ Benefits Analysis (Intangible Benefits)
- ✓ License Analysis
- ✓ Custom Security and Licensing Roadmap
- ✓ Financial Analysis
- ✓ Ongoing Management and Monitoring

Evaluate the security tools in the Microsoft 365 E5 bundle to reduce risk in your environment with Cloud Intel.
