

Data & Infrastructure Migration Assessment

Accelerate Your Cloud Migration with Cloud Intel's AI-Powered Assessment!

Click2Cloud's AI-driven Assessment Service provides a tailored, in-depth analysis of your IT infrastructure, including VMs, databases and other standalone applications, enabling you to strategically plan and prioritize your data and infrastructure migration to Azure. Cloud Intel delivers a comprehensive breakdown—from current state analysis and pricing options to potential risks and next-step recommendations—all powered by its AI Assessment.

With real-time insights, Cloud Intel helps identify migration blockers, assess cloud readiness, define timelines, and provide cost-benefit analysis, security considerations, and sustainability insights.

Our Approach

Discovery

Collect and validate data to assess your current environment.

AI-Powered Assessment

Evaluate infrastructure, cloud readiness, and migration feasibility.

Migration Strategy

Define timelines, dependencies, & a detailed AI-driven roadmap with risk mitigation.

Landing Zone Setup

Configure and optimize the Azure Landing Zone for a seamless transition.

Key Deliverables

Comprehensive AI-Generated Report (Excel/PPT) including:

- ▶ **Current Vs. Target State Evaluation**
- ▶ **TCO-ROI and Financial Impact Analysis**
- ▶ **AI-Driven Migration Roadmap & Timeline**
- ▶ **Security and Risk Recommendations**
- ▶ **Sustainability Metrics Insights**
- ▶ **Architectural Blueprint**
- ▶ **Next-Step AI Recommendations**

Seamless & Intelligent Cloud Migration

Migrate your data and infrastructure to Azure seamlessly and efficiently with Cloud Intel's AI Assessment.
