Infrastructure Migration to Azure with Click2Cloud - **An AMM Partner**

Migrate Your Workload to Azure Seamlessly

Why Do You Need Infrastructure Migration?

- Scale your resources up or down as needed

- Pay only for the resources you are currently using

- Ensure quick data backup and restoration across regions to minimize disaster downtime

- Enhance security with advanced Azure services to protect your perimeter

How Can You Benefit from the Migration

- ✓ Azure Costs provides a detailed breakdown of your resource usage by service, location, and department.

- ✓ Deploy applications in Azure to regions near end users, reducing latency and improving performance.

- ✓ Utilize Azure's extensive developer tools to enhance development efficiency by simplifying the building, deploying, and managing of applications.

- ✓ Simplify IT infrastructure with Azure, reducing the need for in-house management and maintenance of physical servers and hardware.

About Click2Cloud's Azure Migration and Modernization

Click2Cloud's 10-12-week implementation is designed to seamlessly transition your infrastructure to fully optimized Azure environment, ensuring operational continuity, cost efficiency and enhanced security with ongoing support and training of the IT operations team. **Click2Cloud's Azure Migration Approach**

Strategy- Define business objectives & expected outcomes

Plan- Align cloud adoption plan to business outcomes

Ready- Prepare the cloud environment for planned changes

Adopt - Implement the desired changes across IT & business processes

Discover- Collect data and analyses the current inventory

Assess - Assess the IT landscape & provide Business Value Assessment Report

Migration - Migration roadmap and timeline to streamline migration journey

Manage - Implement operational baselines & best practices

Govern- Benchmark & implement governance best practices

Key Deliverables:

- 📊 Business Value Assessment Report

- 💰 Financial Benefits Plan (TCO/ROI)

- 📝 Azure Landing Zone (Artifact including deployment guides, code templates)

- 📋 Proof of Concept & Implementation Ongoing Support

What Will You Gain?

- Entire workload successfully shifted to the Azure Cloud environment

- Applications and data fully operational in Azure with performance and security measures in place

- Optimized Azure setup for maintaining cost-effectiveness and high performance

- Robust security posture within Azure aligned with best practices and compliance requirements

- Reduced IT cost

- Post-migration support ensuring a smooth transition and addressing any immediate operational issues

- Increased business agility

- Enabled digital transformation

Why Click2Cloud?

Click2Cloud's engagement with Microsoft as an **Azure Migration and Modernization (AMM) Partner** add values into your business:

- ➢ Agile delivery

- ➢ Future envisioning with AI

- ➢ Improved security

- ➢ Accelerated digital transformation

- ➢ Sustainable future

Transform Your Infrastructure with Click2Cloud – Your AMM Partner in Seamless Azure Migration!
