

Click2Cloud's Microsoft 365 Copilot Adoption and Change Management

Are Your Users Copilot Ready?

Don't let new technology be daunting. Experience a seamless transition to the cutting-edge AI assistant with Click2Cloud's tailored Adoption and Change Management solution, from onboarding to advanced utilization.

Click2Cloud's ACM Approach :

- Facilitate onboarding and support advanced utilization of Copilot
- Design and implement actions to optimize productivity and performance
- Monitor individual user engagement, success, feature utilization, adoption rate, and business impact
- Provide Copilot dashboards that combine usage metrics, collaboration data, and user sentiment for a comprehensive understanding of usage and adoption
- Identify users' eligibility for Copilot licensing to optimize resource allocation
- Implementation practices for smooth transitions, maintaining change and autonomous communication

What You Will Get :

- Customized training programs based on user roles and needs
- Clear communication channels and ongoing support
- Identification and empowerment of internal change champions
- Copilot dashboards for a comprehensive understanding of usage and adoption
- Clear metrics to track adoption rates, user engagement, and business impact
- Sustainable change environment

Embrace the Future of Productivity and Innovation with Click2Cloud's Microsoft 365 Copilot Adoption and Change Management!
