

Why Clockwise?

Changes in how we work leave us with even less time for what matters

Remote & hybrid Scheduling

Increasingly hard, with new working hours, office locations, time zones

Remote & hybrid Collaboration

An explosion in additional coordination meetings

+24% Time in 1:1 meetings

+29% Time in team meetings

Source: Internal data (April 2020)

Myth

Time management is an individual challenge

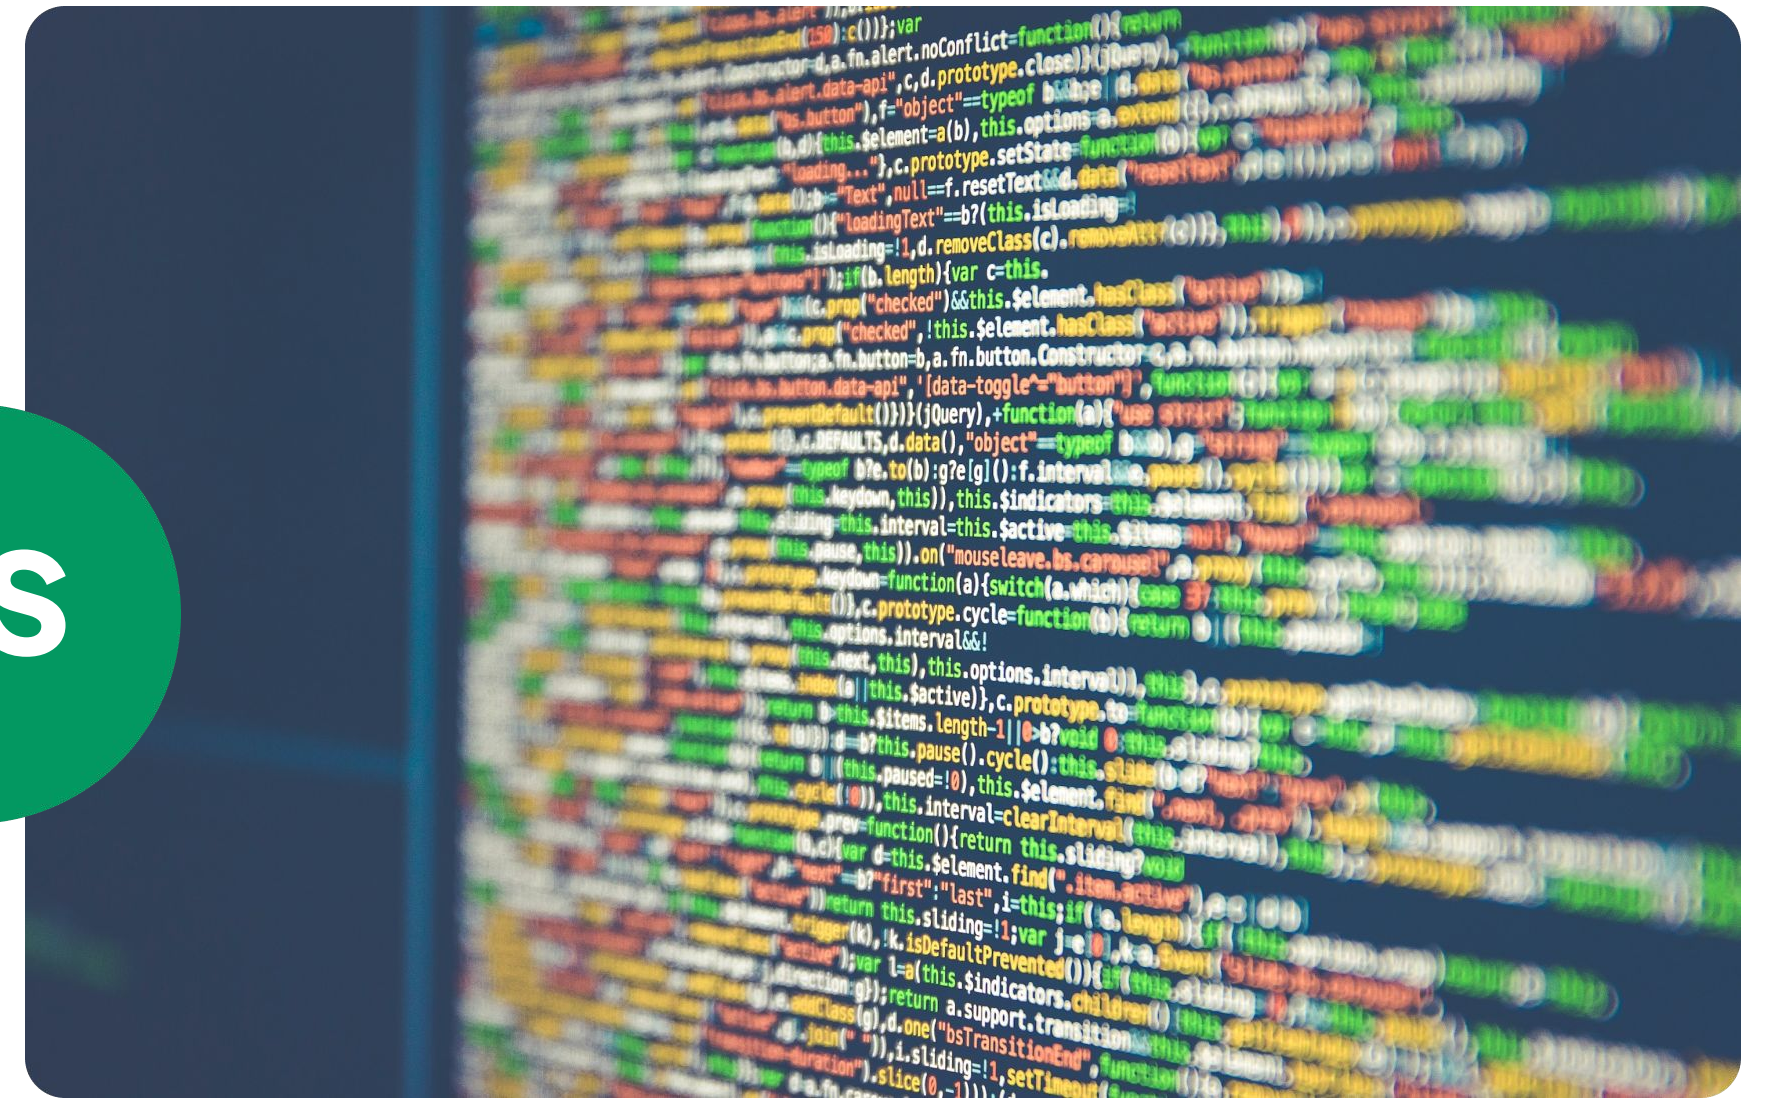

Reality

Time management is often thought of as an individual challenge, but really, time is a shared company resource. And the impact of time loss means productivity loss, which is only magnified at the company scale.

Some problems are better solved by technology, rather than humans

VS

Clockwise solves these challenges using technology to do what people can't

Optimize how you spend your time

Automatically schedule and reschedule events based on your preferences

Create and protect Focus Time

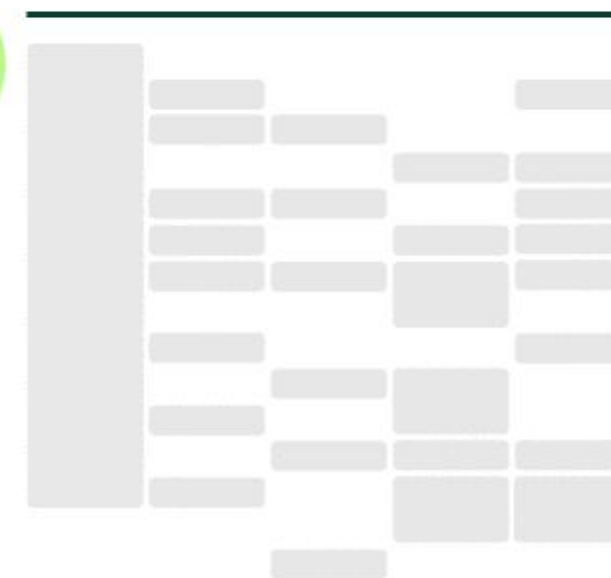

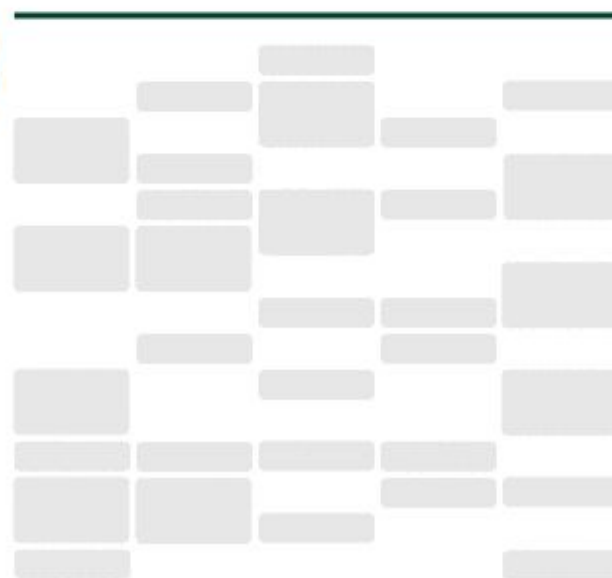

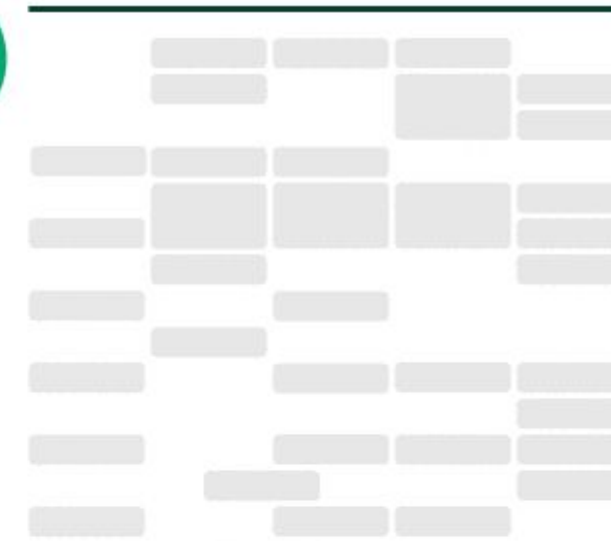

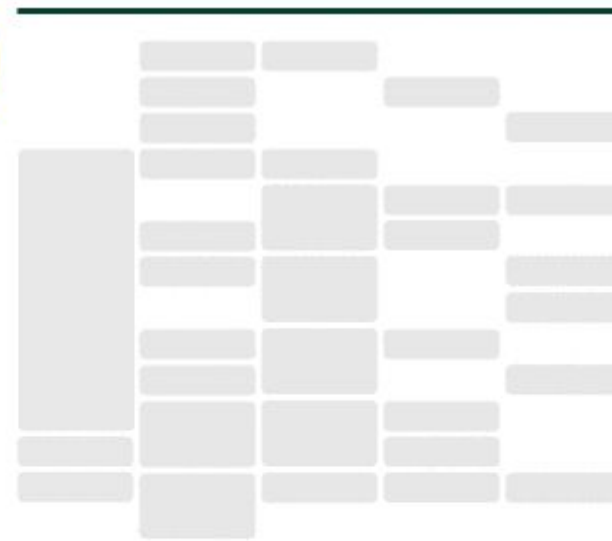

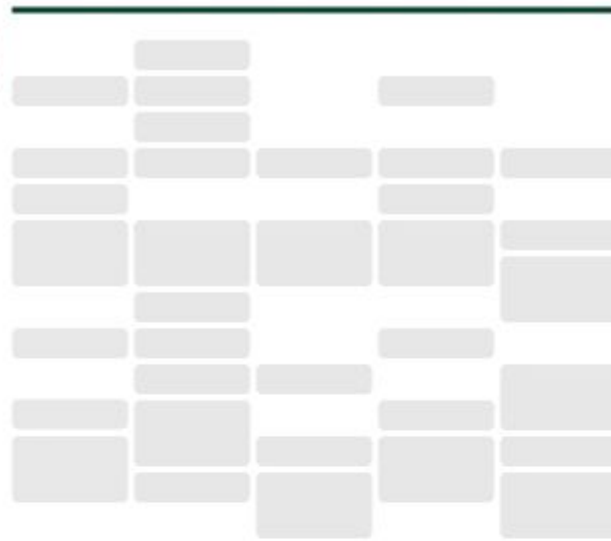

Enjoy long uninterrupted blocks of time for increased productivity

Improve team coordination

Support your team with automatic No Meeting Days, OOO calendars, and integrations with Asana, Slack, and Microsoft Teams

Only Clockwise can optimize calendars across your entire organization at once

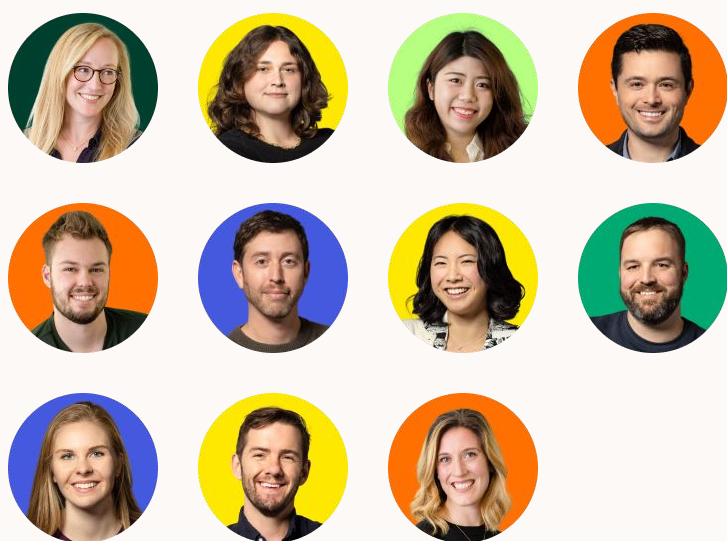

Technology-driven time orchestration magnifies collective productivity impact

Below is an actual network optimization for a major FinTech company (9/20/21)

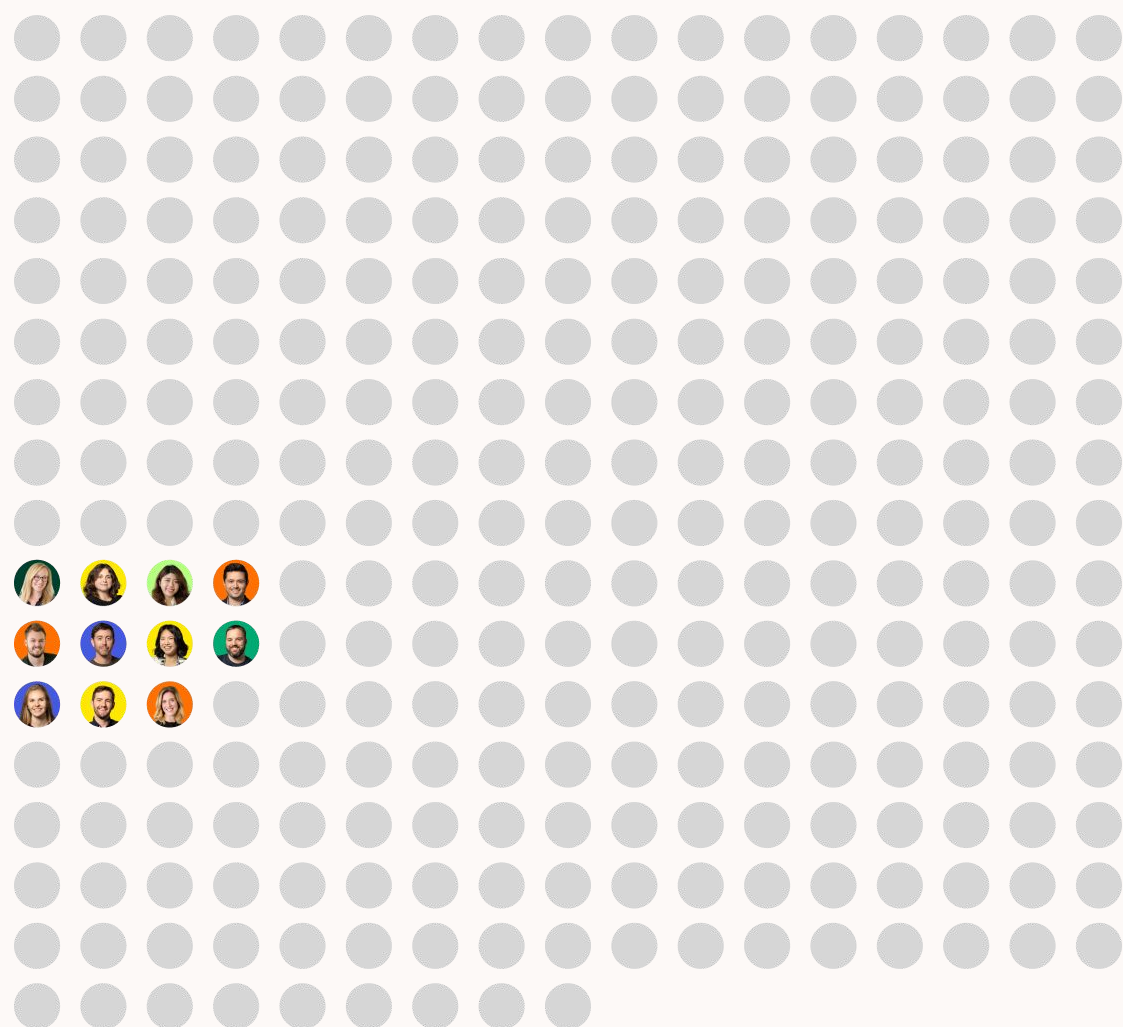

Individual benefit
Engineering Manager

9 Conflicts resolved
+3 Hours of Focus Time created

Team benefit
10 teammates benefited

15 Conflicts resolved
+9.5 Hours of Focus Time created

Org-wide benefit
281 coworkers benefited

188 Conflicts resolved
+123 Hours of Focus Time created

How Atlassian makes time work for their team

The Problem

As part of their Team Anywhere approach to distributed work, Atlassian needed to preserve time for deep work by minimizing both the amount of meetings, and time spent scheduling meetings.

Solution & Impact

Automatic scheduling via Clockwise means that additional time is not spent calculating time zones and comparing calendars to book a meeting. And protected Focus Time means the team is able to make space for the deep work that is best done asynchronously, like coding, researching, and status updates.

Clockwise has created 158,934 hours of additional focus time and resolved 139,107 meeting conflicts for the team at Atlassian.

"It's part of our company culture to use Clockwise. It's been really beneficial because it's a respected spot on our calendar, whether it be for lunch or Focus Time. I use it for both, and it's been great."

— Alex White, Senior Software Engineer
