

We cloudify your business

XIBIX: 5-2 cloud approach

2. Plan

- Cloud roadmap and timeline
- Cloud strategy assessment
- Migration and building plans

4. Migrate

- On-premise to cloud
- Monolithic apps to microservices
- Cloud-to-cloud

1. Analyse

- Cloud readiness assessment
- Cloud architecture audit
- Security roadmap (i.e. TISAX,ISO)

3. Build

- Enterprise collaboration
- Cloudnative infrastructures
- Multicloud serverless architectures

5. Managed

- CloudOps & DevOps
- Cloud and security governance
- Finance management

XIBIX: Cloud consulting services

Cloud workshop

1-2 days (virtual) engagement that's conducted on your cloud premises and needs to identify your pain points and develop a profound catalogue for the cloud assessment

Cloud-of-concept

Inspired by the cloud assessment a proof-of-concept with a limited-scope implementation to determine whether the cloud solution fulfill your requirements.

Cloud evolution

A ongoing cloud consulting service continually evaluating, developing and questioning your cloud solutions to put your cloud environment to a next level and develop a cloudnative infrastructure in a emergent way.

Cloud briefing

1-2 hour introduction to get to know each other and give insights into our cloud consulting service to draw your interest by using our 5-2cloud approach

Cloud assessment

An 1-2 weeks detailed evaluation of your cloud environment to determine the applicability of your solution and provide an estimate of cost and timing for the next step.

Cloud implementation

With regular stand ups in an agile working setup, pre and post testing and final sign off we develop a complete installation that results in a fully individualized working cloud solution.

Cloud training

Customized up-to-date Azure trainings for all levels, from architecting and administration to DevOps to challenge and evolve your employees to self-confident cloud native specialists.
