

## Azure Compliance

### Assessment

Complying with legal and regulatory standards is critical for many businesses, so the stakes are high and failure is not an option. Before you can become compliant, you need to know and understand how to achieve it. But how do you figure it out? With this Azure Compliance, Cloud Direct will help you build a framework that will help you manage compliance requirements of your workloads deployed in the cloud.

### Identify your target state

We'll evaluate your specific compliance requirements and assess what you already have in place. Using Microsoft's guidance on compliance controls we'll create a framework fitting for your compliance needs.

### Minimise risk of failure

A gaps analysis makes it crystal clear what is needed to build a framework for compliance. We'll help you understand the next steps to pass a compliance audit and remain competitive in your market, retaining and gaining customers.

### Gain knowledge and confidence

We believe in partnering with our customers and sharing our knowledge. We'll walk through the recommendations - but more importantly explain why. Get the knowledge and confidence you need to manage your compliance.

## Providing the support you need

-  Experts in the UK and Cape Town, dedicated to serving Cloud Direct customers
-  Our world-class Net Promoter Score of 85 proves how happy our customers truly are

## Contact Cloud Direct
