Well Architected Review
Optimisation

Your Azure environment doesn't sit still. That's the nature of the cloud. It's never the wrong time to check for opportunities to reduce spend, increase security and boost technical performance. The Well Architected Review – Optimisation gives your Azure environment an in-depth audit to identify the opportunities that will provide the biggest returns. We'll work with you to understand where your priorities lie so we can present the most relevant set of curated recommendations back to you.

Audit against best practice

Tell at a glance if you're taking the necessary steps to build reliable, secure, and cost-efficient solutions, and to prioritise the actions that will yield the biggest improvement to the posture of your workloads.

Prioritised optimisations

We'll break down your recommendations into categories so you know which should be actioned immediately and which can be added to the strategic roadmap.

Align with the WAF

We believe in partnering with our customers and sharing our knowledge. We'll walk through the recommendations – but more importantly explain why – so that you can embed best practice, such as Microsoft's Well Architectured Framework, into your future plans. Reap benefits such as cost optimisation, security, performance efficiency, reliability and operational excellence.

Providing the support you need

☑ Experts in the UK and Cape Town, dedicated to serving Cloud Direct customers

☑ Our world-class Net Promoter Score of 85 proves how happy our customers truly are
