# Azure Consultation Package: Security Design Review

Who's it for?

For organisations that are already using Azure at scale or will be imminently and want to have the safest environment possible that has been tested and verified by an external Azure Expert.

The package in a nutshell...

Providing you with training, processes and security settings to have the confidence and ability to progress your adoption of Azure. Ideal for organisations who are doing small amounts in Azure and want to scale-up.

What will my business get from this?

Review and recommendation report from a certified Microsoft Azure Expert MSP. Follow up review and training to ensure you have all the tools in place to deliver a secure environment.

What's included?

Stage 1 - Design review:

We will meet with your technical teams and key stakeholders to understand the business context and technical security design of your Azure environment.

Stage 2 - Assessment and recommendations:

Assessment and recommendations: Following a thorough review of your security design we will present our findings and any recommendations for further enhancements.

Stage 3 - Progress review:

We will come back on-site to assess any changes made, provide further training to your in-house team where needed.
