Operate

DevOps Assessment

Positioning

Optimise DevOps practices

An in-depth analysis of current software release lifecycle. A review of DevOps environment and practices to identify optimisation opportunities for cost, performance and security.

Benefits

DevOps improvement plan

This service will provide you with a comprehensive plan detailing your adoption and maturing DevOps strategy

Deliverables

DevOps Innovation report aligned to your organisation requirements.

Walk through with key business stakeholders.

Summary of works

Requirement gathering workshops

Stakeholder workshops to identify the requirements and existing processes and technologies in the following areas:

- Agile Software Development
 - Version Control
- Continuous Integration and Continuous Delivery (CI/CD)
- Infrastructure as a Flexible Resource
 - Continuous Security
- Configuration Management
- Continuous Monitoring
 - Culture

Analysis of data points

Cloud Architects to do an in-depth analysis of all data gathered. Data will be mapped to the Well Architected Framework and DevOps best practice.

Cloud Direct will identify innovation options for optimising and improving the software lifecycle and DevOps environment.

Stakeholder walkthrough

A walk through of the analysis and DevOps innovation recommendations with stakeholders.

Helping all parties understand the findings and recommendations to inform a business decision on next steps.
