## Microsoft 365

### On-boarding Assessment

Microsoft 365 helps your business improve cybersecurity, reduce costs and empowers your employees to work from anywhere. Still, it's easy to feel out of control as your Microsoft 365 environment drifts over time. The Microsoft 365 On-boarding Assessment helps you audit and understand the health of your environment. Review your environment to detail what's in place and what needs to be done for optimal performance, adoption, and security. We'll give you the confidence to drive your business forward, adapt to disruptions, and embrace change.

#### Align with best practice

Best practice means improving performance efficiency. Check the health of your tenant to uncover your requirements and rate your existing tools and configurations against them.

#### Build a clear roadmap

Identify areas of improvement to increase confidence and encourage greater migration, performance efficiency and improved security posture preparing you to optimise your environment and on-board to a managed service.

#### Maximise your investment

Find out how to get the biggest bang for your buck. Understand your licence capabilities and identify the next steps to optimise your licence usage for improved performance, reduced costs and risks.

### Why Cloud Direct?

-  Microsoft Azure Expert MSP partner (audited annually by Microsoft)
-  Cloud first MSP - specialists in cloud solutions
