Plan

How

Zero Trust Design

What

- Deep dive requirement gathering workshops with CISOs and technical leads
- Deep analysis of security vulnerabilities
- Low-level phased Zero Trust design

Value

- ▣ Outline the transformational vision
- ▣ Plan using real and current assessment data
- ▣ Reduce operational risk

Zero Trust Design

Positioning

Adopting Zero Trust

The Zero Trust Design will take the information from the Discovery phase and move it to the next step by running workshops with stakeholders, functional deployments, and organisational requirements.

Benefits

Build a strategic roadmap

This service will provide insight and recommendations on how to adopt Zero Trust.

Deliverables

A roadmap detailing the time and resources needed to implement Zero Trust measures.

Walk through with key business stakeholders.

Summary of works

Requirement gathering workshops

Workshops will be held with technical stakeholders to discuss in more depth the impact of implementing quick wins and urgent tasks and time needed to implement the remediations outlined at the Discovery phase.

Stakeholder walkthrough

A walk through of the analysis, requirements and proposed solution with stakeholders.

Helping all parties understand the findings and recommendations to help inform a business decision on next steps.

Design

Cloud Direct will create low-level design documents to present to the customer.

The immediate next steps will be linked to the implementation of the agreed quick wins and urgent actions. The design for this phase will detail the deployment for the next set of iteration of security improvements into the customer environment.
