

# Fabric Fast Start

## Accelerate Your Data & AI Journey with Microsoft Fabric

Our Analytics Fast Start gives you an accelerated implementation of Microsoft Fabric, enabling you to gain insights into business data and make data-driven decisions. Starting with a discovery phase to align business priorities and map out potential use cases, an agreed use case will be prioritised in the engagement. We will design, deploy, and configure phases in building out your Microsoft Fabric solution, and provide enablement in operating the platform successfully, giving you all the tools you need for long-term success

### Your accelerated journey to value

#### Discovery

Aligned with business goals, we identify and prioritise a use case to kick off the Fast Start. This initial phase benchmarks current analytics practice, covering systems, processes, governance, data quality, readiness, and culture, to ensure the chosen use case drives success.

#### Design

Tailor the solution to your unique business needs, through detailed technical design. This step ensures that our approach aligns with Microsoft Best Practices offering a secure, scalable and robust solution in meeting both current and future business requirements.

#### Deployment

Working with the business in readiness to deliver a tailored solution covering ingesting, modelling and transforming data into insight providing solid foundations with data that is modelled, trusted and aligned to serve the business.

#### Enablement and Handover

The structured handover will empower your team with the knowledge and tools needed to manage and optimise the platform independently. This includes a one-day consultancy session with our experts to work through and address specific user adoption questions and challenges.

### Benefits

- ▶ **Accelerated Time to Value:**  
Quickly prove and demonstrate the value of Microsoft Fabric within your business.
- ▶ **Customised Solutions:**  
Tailored technical design to fit your specific business needs and objectives.
- ▶ **Expert Guidance:**  
Benefit from the expertise of our experienced Data & AI specialists and consultants.
- ▶ **Comprehensive Enablement:**  
Ensure your team is fully equipped to manage and optimise the platform for long-term success.
- ▶ **Risk Mitigation:**  
De-risk the implementation of this technology through a specific and pre-defined approach that ensures your Fabric deployment project stays on track.
- ▶ **AI Readiness**  
Get your business ready for AI, with a solution, that provides access to trusted, reliable and governed data to data for AI and Machine Learning use cases with a platform that serves both current and future requirements.
