

Data Intelligence MVP

Accelerate Your Data and AI Journey with Microsoft Fabric

Our Data Intelligence Audit offers a concise, MOT-style review of your data, BI, and analytics posture—highlighting key strengths, weaknesses, and actionable priorities. This audit sets the foundation to unlock value, build resilience, and drive transformation with data.

Your accelerated journey to value

Discovery

Collaborate with business and technical stakeholders to identify a high-impact use case, benchmark current analytics practices, and define success criteria. This ensures alignment to both immediate business needs and long-term strategic goals.

Design

Develop a tailored design that aligns Microsoft Fabric to your business objectives, creating a modern data platform that proves value for the initial use case while establishing a foundation for future scalability.

Deployment

Deploy and configure Microsoft Fabric to deliver the identified use case, uploading and modelling data to generate a Power BI report that demonstrates actionable insights. This phase validates feasibility and showcases the tangible business benefits of Fabric.

Enablement and Handover

Work collaboratively to review the solution, walk through platform capabilities, validate outcomes against success criteria, and share findings. Provide strategic recommendations and define next steps for productionising the solution, with a clear roadmap for scaling analytics and AI adoption across the business.

Benefits

- ✓ Accelerated Time to Value – Rapidly validate Microsoft Fabric's ability to deliver actionable insights against a real business use case.
- ✓ Strategic Alignment – Demonstrate clear alignment of the platform's capabilities with strategic priorities, ensuring data investments directly support business objectives.
- ✓ Proof of Feasibility & Future Readiness– De-risk larger investments by proving the technical feasibility and business value of a modern data platform, while creating a roadmap for scale.
- ✓ Empowered Teams & Collaborative Adoption – Work side-by-side with business and technical teams, building capability and confidence to adopt, extend, and productionise the solution.
- ✓ Strategic Roadmap & Next Steps – Deliver clear recommendations and a forward-looking plan for how to embed, expand, and maximise value from Microsoft Fabric across the business.
