

Microsoft 365 Migration

Onboarding to Microsoft 365 doesn't need to be stressful. You just need an experienced partner to guide you every step of the way.

Your first step is to decide which licence is right for you. We will run a licencing assessment to:

- Identify how productive, collaborate and secure you want to be
- Determine your preferred method of communication is
- Generate a recommendation report summarising the outcomes

*Did you know we delivered the first Microsoft 365 Business project in the UK?
And many more since!*

Once you're set on a licence, you're ready to be migrated to the new world.

Standard Migration

Our standard migration will switch you over to Microsoft 365 with your emails all moved over to Exchange Online so you can begin quickly.

Fully Managed Migration

The fully managed service will go further by proving your end-users with a professional installation service. We'll call each of them to help them setup their new Office applications, ensuring they're comfortable with their new technology for a seamless experience.

We will:

- Setup your tenant and open new mailboxes in Exchange Online or Exchange Hybrid
- Migrate email data
- Configure Active Directory
- Help end-users install Office applications on their primary working device
- Provide a selection of learning resources
