

# Task Intelligence Proof of Value

## Rapid AI Use Case Delivery

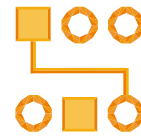

A focused 3-week engagement to prove the feasibility and business value of AI by automating or augmenting a single prioritised business task. This lightweight proof of value showcases how AI can deliver measurable impact quickly, while laying the groundwork for scaling through a production-ready MVP.

## Business Value

### Quick Validation

Demonstrate tangible value from AI in just 3 weeks.

### Operational Efficiency

Showcase time savings, accuracy gains, or risk reduction through a real use case.

### Decision Confidence

Provide evidence to support executive buy-in and prioritisation of future AI investments.

### Clear Next Steps

Define roadmap options for scaling into a production-grade MVP.

## Key Outcomes

### Proof of Value Solution

A functional AI solution addressing a prioritised business use case.

### Feasibility Assessment

Validation of data readiness, integration potential, and business alignment.

### Success Criteria Review

Clear view of benefits achieved against agreed KPIs.

### Roadmap & Recommendations

A functional AI solution addressing a prioritised business use case.

### Scalable Framework

Robust design, aligned with Microsoft best practices, that provides a secure and reusable foundation for future AI initiatives

### Future Roadmap

A functional AI solution addressing a prioritised business use case.

## Engagement Structure

- ▶ **Week 1 - Discovery & Design**  
Confirm business priorities, success measures, and design a focused PoV solution.
- ▶ **Week 2 - Build & Configure**  
Develop and configure core AI workflows against the selected task.
- ▶ **Week 3 - Demonstrate & Validate**  
Refine based on feedback, showcase impact, and deliver recommendations for next steps.
