CLOUD1

Let's Make Data Work for You

Microsoft Azure

We help our customers turn data into business benefits, new innovations and streamlined processes by building digital architecture solutions that provide a competitive edge.

What we offer

Architecture Steering

Cloud1 helps you to create a roadmap for using data efficiently, building modern digital architecture, efficient data warehousing and achieving a data-driven cloud transformation in the organization

Modern and Scalable Data Platform

The Cloud1 Data Hub concept pulls data from silos and helps organizations leverage it in business development. Using the Data Hub concept, we can help you build a modern, future-scalable platform with a single data core.

Product Development Services

Customer-oriented, data-intensive solutions, new data-based services, applications and products implemented using the latest cloud technologies.

End-to-End IoT Services

Customized IoT solutions provide you with more information on your business, improve productivity and reduce costs. We design and implement comprehensive IOT solutions that enable companies to utilize real time data for operational development as well as risk prevention and management.

"What our customers are saying

"What makes Cloud1 unique is that it combines a broad understanding of business with deep technological know-how. When business needs have been defined, they make it easy to implement the solution in practice."

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

Why Azure

Be future ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your own terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
