# CLOUD STRATEGY

CLOUD²

# Pieces of a successful cloud journey!

CLOUD²

Lead:
Communicative leadership on the cloud journey is vital to success.

Create a strategy:
Create a link between technological needs and business.

Try:
Create an enabling environment to experiment

Govern:
Define boundaries for action, publish guidelines, and provide transparency.

Get organized :
Create roles for cloud management, provide training.

Evolve constantly :
Start small, iterate and learn

Enabling culture:
Change starts with people and belongs to everyone.

Be adaptive:
Measure, update the plan, adapt and question. everything

Cooperation :
With the right partner, you increase your chances of success tremendously.

Adaptive Cloud Journey

CLOUD²

- Vision of direction and state of mind

- The model how we operate

Who, what and how

Cloud Strategy

Cloud Governance

Cloud Management

Roles and responsibilities

Capabilities and skills

New services and migrations

Adaptability gives time and opportunity for continuous improvement

General Principles

CLOUD²

Selected cloud providers

AWS, Azure, GCP? What are the principles for utilizing them?

IaaS, Paas, functions ?

Multicloud

Can many platforms be used?

How do we consider vendor-locking

Hybrid cloud

Do we need on-prem resources?
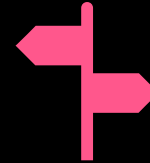

Data Location

Where our data can be located and how it is protected?
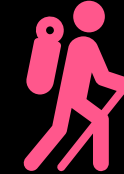

General Principles

1 Cloud First

Are cloud platforms used primarily?

Service Model Selection

Primarily SaaS services?

Or do we build services ourself? Utilizing PaaS components, etc.

Cloud Journey

Will everything be migrated at once or as new systems come along?

Business case…
