# Introduction

Flyte are a Microsoft M365 specialist and Software Development company focused on delivering creative and effective technology-based solutions to a global customer base, across a breadth of industries and sectors.

Our journey started in 2012 as Cloud Cover IT, an IT Managed Services provider, with a mission to empower organisations through technology across the central belt of Scotland, UK. In 2016 we became a Microsoft Gold Partner with the strategic ambition to become the leading Microsoft Consultancy practice in Scotland, known for leveraging the Microsoft technology stack to empower business.

As opportunities with Microsoft and the Modern Workspace have continued to grow, **Flyte** is the next stage in the journey to becoming recognised as a market leader in cloud technology solutions on an expanding, global platform.

Flyte is now part of the Microsoft ISV Success Program

3-Day Microsoft Teams App DISCOVERY Workshop

flyte.cloud

Our 3-Day Microsoft Teams Discovery workshop is a comprehensive and immersive experience designed to enable organisations to harness the full potential of Microsoft Teams. This workshop is tailored to address the unique needs of your business, enabling you to enhance collaboration, increase productivity and streamline communication workflows.
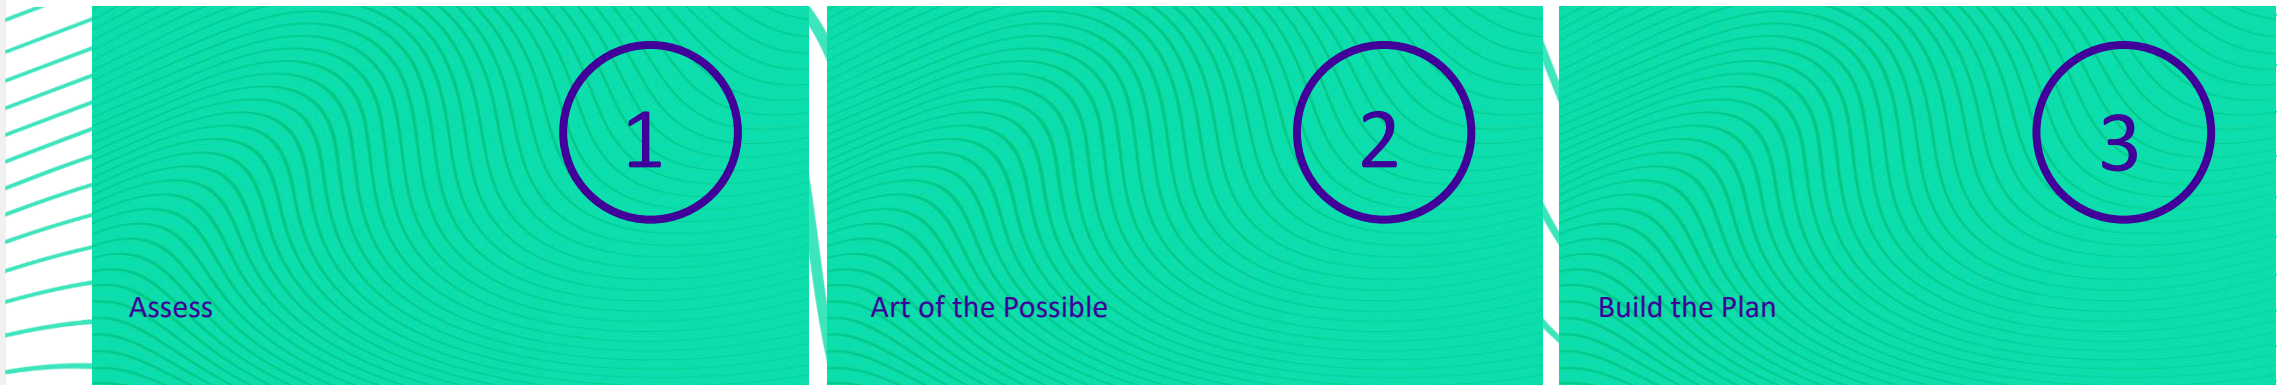

Successful adoption of powerful technology can be challenging and we often find that organisations are only scratching the surface of what is possible with Microsoft Teams. This workshop will help you fully leverage Microsoft Teams within your organisation, identifying key areas for optimisation and enabling you to fully benefit from your Microsoft investment.
