Enable modern endpoint management with CloudEdge and Microsoft

The ability of employees to connect to business data no matter where they are and from any device is a significant benefit in today's world, but it can open up your business to security risks. Enable your employees to do their best work on any app, device, or network—while protecting company data—by modernizing the way you manage every endpoint.

With the right endpoint modernization strategy, employees get a secure experience on every mobile device, tablet, or laptop they're using, all while eliminating major management headaches for IT.

51%

of organizations are ineffective at surfacing threats because their endpoint security solutions are ineffective.[1]

Let Microsoft help you enable secure and productive hybrid work

With Microsoft and CloudEdge, get the tools and services you need to manage mobile, desktop, and virtual endpoints while enabling secure access to corporate resources from anywhere.

Empower employees with modern technology

Simplify device management and security

Secure your hybrid work environment

Enable a connected, secure workplace

CloudEdge has the expertise to move your organization ahead

As a Microsoft Partner with 10 years of experience helping organizations achieve their IT business goals, we offer unrivaled expertise and innovation in Microsoft technologies.

With our Endpoint Management Workshop, learn how to enable your users to be productive, on any device, without compromising IT security. We'll help you manage and protect your devices, your apps, and your users through intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use.

Optimize endpoint management with our solution

Our collection of solutions will help you quickly perform and accelerate the capabilities of managing your Endpoint Devices efficiently and with little work input combined with technical tools we have developed and the vast professional knowledge we have accumulated from our many clients.

- Professional workshop for transferring Kickoff knowledge arranged to start the solution

- Design and characterization up to the architecture stage of the solution including licensing design that will suit your needs

- Use automation tools to identify and implement the solution quickly

- Guidance and thickening get arranged for the relevant operating factors

Manage and protect your devices, your apps, and your users

Endpoint Management Workshop

Our Endpoint Management Workshop provides an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll customize the workshop based on your organization's needs

Engagement set up

- **Microsoft Endpoint Manager**
- **Baseline security**
- **Device config and management**

Design and planning

Customer value conversation

Discovery session for endpoints

Key results, recommendations and next steps

You'll walk away with the ability to enable your users to be productive, on any device, without compromising IT security. Experience the power of modern device management within your own environment.
