Azure CAF Landing Zone

Our landing zones provide a scalable, modular approach to expand your cloud environment based on a common set of design areas.

Whether you are deploying your first production application to Microsoft Azure or you are operating a complex portfolio of workloads, the Microsoft Azure landing zone implementation options are tailored to your specific needs.

Follows Microsoft standards

CLOUDEON
We Elevate Business

CLOUDEON brings your Cloud migration and operation ideas to reality. We take your current IT-setup and elevate it to a secure Cloud solution, customized to your business' needs. You will be equipped with a platform that provides improved agility and unlimited scalability for your business.

What are the objectives? What is the value?

Objective

Value

01 Land → Align the Landzing Zone to your usage scenario, ensure traceable steps is available

Start wih a proper and correct enrolment based on cloud templates and architecture blueprints

02 Ensure → Tie your cloud to your current identity and security regime, get the foundation right

Based on well-established identity and security baseline, you set the rules and the route ahead

03 Expand → Expand your footprint to the cloud, built on top of a well-established framework

Based on well-established baseline, you can expand with modern functions, new applications andsoftware

04 Govern → Add modernized governance disciplines to the technology organization

Automate auditing and enforcement of security, governance, and compliance policies

05 Operate → Build the next generation operational regime and ensure the viability

Provide ongoing operations with visibility, operations compliance, protected and recoverable capabilities.

Overview Flavours

Essential

We get you started

Explore the cloud without risks, we expedite your cloud journey and ensure the key components are under control. Includes a basic provision of standardized architecture, default governance, basic security and operations parameter are set and ready for initial innovation projects.

1 Week

Business

We make you fly

Take your small to medium business to the cloud – and get a fast-tracked, best-practice implementation of a baseline architecture covering governance, security, monitoring and access control. Includes core wokshops, implementation guides and best practices to ensure a successful cloud adoption.

4 Weeks

Enterprise

We give you the full overview

We establish an Entprise Ready landing zone based on the ISO27001 framework and ensure full operational readiness using custom ITSM as well as advanced governance and security controls. The landing zone is created utilizing standardized Terraform Component libraries, ensuring a best in class operational foundation for all cloud workloads.
