Beginning the Journey

Migrating to a cloud environment beings with a well thought out strategy

When a large organization begins a cloud migration journey, the process is complex and spans across many teams and divisions. Beginning this process with a partner who has experience with large scale transformation will set you up for long term success.

Complex migration strategies take time and careful consideration of both technology and business requirements

Partnering with an experienced solution provider can assist in identifying unknown risks and concerns

Creating a migration strategy before the work begins delivers the business results required for success

Azure Readiness Assessment

This 4-week engagement will help you identify and document the business outcomes needed for your cloud migration as well as the technology goals.

More than just a high-level review, careful evaluation of the IT estate allows us to determine the most appropriate migration methodology for your workloads. cloudEQ will deliver a roadmap that you can use to guide your project and team through design, tool selection and budgeting.

Deliverables Include:

- Executive Summary
- Cost Assumptions
- Basic Architecture
- Resource Requirements
- Change Management Plan

Partnering with Microsoft

cloudEQ partners with Microsoft to deliver to our clients:

- Continuous innovation and thought leadership
- Support of hybrid design options
- Wide variety of tool choices
- Robust security and compliance

cloudEQ is led by a team of IT professions who have “sat on your side of the desk” and now guide IT executives though their cloud journey.

Case Study: Global Transformation

Our client had a strategic vision to retire all legacy on-premises data centers globally. We launched the project together and remained their lead solution provider through a multi-year project.

- *3000 Servers migrated*
- *Multi-platform design*
- *High availability solutions*
- *Advanced data transfer technology*
- *Applications re-platformed and modernized*
- *Corporate and business unit system migrations*
