Microsoft 365 Compliance Assessment

Clarity and direction. Your Microsoft compliance journey. Accelerated.

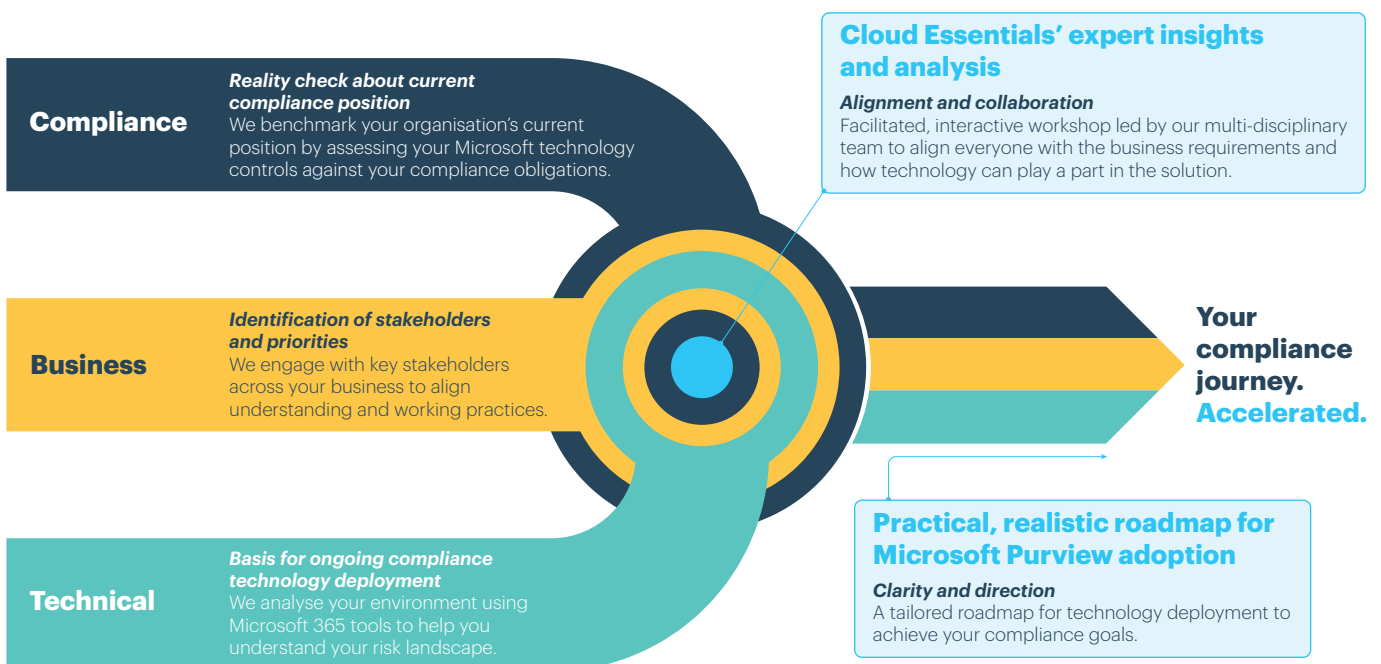

Compliance is a journey. And it's not straightforward. The landscape of national, international and industry regulations is constantly moving. Technology is rapidly evolving. Complex risks arise internally and externally.

A successful programme demands alignment of people, process and technology, a realistic roadmap and a multi-stakeholder team collaborating across the business.

Starting with solid foundations

Our Microsoft 365 Compliance Assessment is our recommended starting point.

Through a series of engagements and interactive workshops, our multi-disciplinary team of compliance and tech experts deliver a tailored roadmap and recommendations to provide the clarity and direction required to make a flying start.

Cloud
Essentials

Outcomes from the Microsoft 365 compliance assessment

1. A view on your **current position** on compliance in Microsoft 365 and other areas of vulnerability
2. A greater understanding on **what's available** to you from Microsoft 365
3. Engaged in high **quality conversation** on key topics with relevant stakeholders across your organisation
4. A **realistic roadmap** for deployment and documented recommendations to reduce risk
5. **Quick wins** on using capability that you already own, increasing value from your licence spend
6. Guidance on improving the **effectiveness of your compliance programme** using Microsoft controls

The insights and roadmap generated at the end of the Assessment form a robust basis for your ongoing compliance journey. Tailored for your unique business needs, we can help you on this journey with our Compliance Accelerator Programme.

"I found Cloud Essentials' approach [...] to be very effective at taking what seemed like a daunting and complex environment and breaking it down into sensible and easily consumable parts. Their depth of knowledge in this space is impressive."

Richard Simpson, Managing Director
BulkSMS.com

A practical and sustainable Microsoft compliance strategy for BulkSMS

Cloud Essentials worked closely with BulkSMS to raise awareness of their current compliance posture in relation to content and collaboration in Microsoft 365, and guarded against overestimating compliance maturity in some areas. Our interactive workshops brought more than just alignment with regulation, they also delivered a fresh way of thinking about data compliance, looking at it in a practical way that combined people, process and technology. The output was a structured roadmap that delivered clear recommendations to underpin the client's ongoing compliance strategy.

The Cloud Essentials difference

We firmly believe that the best solutions are just as much about people and processes as they are about technology.

We will always take your unique organisational context into account and ensure we leave you with the knowledge, skills and understanding that underpin a sustainable compliance strategy.

Uniquely, we speak the languages of IT, innovation, digital transformation, governance, risk AND compliance to help accelerate initiatives and deliver business benefits for everyone.

Ready to unlock the power of Microsoft Purview?

We know that every compliance journey is different. Get in touch to arrange a discovery call to see how we can help you enhance your compliance maturity with Microsoft Purview.
