

## Cloud Essentials

### Tenant-to-tenant migration

**Fast, smooth and secure migrations that minimise user disruption and maximise business returns.**

A tenant-to-tenant migration may be one of the biggest and most complex migrations your organisation will ever undertake.

Those in the know understand that it's also the perfect opportunity to maximise future returns on your technology investment.

Let our skilled migration team help you effortlessly

navigate the challenges of today's migration with an eye on optimising your target environment for an even more successful tomorrow.

"Cloud Essentials understands the importance of carrying out a project the right way, no matter the size of it. They don't take any shortcuts."

-- Global construction client

### Experts at coping with complexities

We've successfully completed some of the biggest and most complex tenant-to-tenant migrations around. We routinely handle projects with:

- Tens of thousands of users
- Terabytes of data
- Multiple geographies
- Hybrid environments
- Complicated co-dependencies
- High value and/or sensitive data
- Requirement for co-existence from day one
- Inconsistencies in security and governance policies and settings

### Our migration credentials

- 11 years' experience in complex cloud migrations
- 7 Gold Microsoft Partnerships
- Microsoft Content Services Partner
- Extensive experience in highly regulated sectors

### Your needs

Mergers, acquisitions and divestitures are sensitive times for any organisation. Getting your data successfully from A to B is only half the challenge. You also need to maintain security, continue to meet your compliance obligations, iron out inconsistencies between tenants, navigate delicate organisational politics, sustain your users' productivity and ease their transition.

### Our solution

Cloud Essentials specialises in complex tenant-to-tenant migrations. We offer fully managed, end-to-end migrations within a fixed budget and timeframe. We understand that you need reliability in a time of great change. We emphasise project planning with a specific focus on security and governance.

Our aim is to go beyond solving your immediate migration challenges to maximise your cloud efficiencies, ensure robust security and enhance your data governance and compliance postures moving forward.

## What's included?

- **Advice** at the due diligence stage to set your project up for lasting success.
- **Security and governance** assessment to unpack your data governance considerations, vulnerabilities, potential cost savings and best practices.
- **Experienced technical architect** as your project lead, together with a project manager for effortless coordination.
- **Custom-built Azure-based SaaS migration platform** combining the best technologies with our proven migration methodology.
- **Operational runbooks** tailored to your project to streamline operations and optimise stakeholder communications.

"The services we provide mean our business is pretty much a 24/7 operation, so any break or downtime in key line-of-business systems as we migrated would not have been acceptable. This was a smooth migration with very little impact on the business during the changeover."

-- Alan Quinn, CFO,  
Empact Group

We'd love to discuss your tenant migration project. Contact us for a no obligation discussion about your requirements.

## Our methodology

We've successfully completed some of the biggest and most complex tenant-to-tenant migrations around.

We routinely handle projects with:

- **Scope.** Detailed understanding of requirements to set expectations and fixed price.
- **Security Baseline Analysis** of data governance and security procedures to ensure the target tenant is built on a foundation of robust and secure settings.
- **Design.** An efficient migration service designed to meet your specific business needs, using the right tools for your requirements.
- **Test.** Rigorous pilot testing and validation process and feedback.
- **Migrate.** End-to-end migration service using our own SaaS migration platform in Azure to ensure optimal security and performance.
- **Optimise.** Transparent performance optimisation and issue resolution throughout
- **Mature.** Post migration recommendation for maturing security and compliance, and realising value from the new platform
- **End-to-end support and account management** Our highly experienced Cloud Architects and technical team will make sure the design and delivery of your migration is smooth and hassle free. We pride ourselves on our excellent client service.

## Your cloud journey. Accelerated.

We know that the journey doesn't end once the migration is complete. We offer ongoing guidance to help you take full advantage of Microsoft's cloud functionality or help you find complementary solutions to solve your business problems. We can advise on backup and archiving, optimum use of cloud technology and getting the most from your Microsoft licences.
