

# CompanyGPT on Azure

Tailor-made AI solution based on ChatGPT directly embedded in your knowledge management system to stay on top of every AI development without ever giving up on data security and compliance.

## Zero-effort commitment with guaranteed security & support

We integrate CompanyGPT and handle all necessary customizations and configurations. We ensure the integrity and confidentiality of your company data. We take care of training your employees and will provide ongoing technical support and innovative long-term partner.

## Improve efficiency across multiple areas of the business

From sales and marketing to logistics and R&D, CompanyGPT streamlines search and analysis processes and supports critical decision-making. Scale your productivity with improved insights into company activities and cross-department knowledge access.

### Your Customized GPT

CompanyGPT on Azure is designed specifically to your needs to ensure seamless integration with existing processes. It understands and responds to your company-specific data, policies, and challenges.

### GDPR compliant

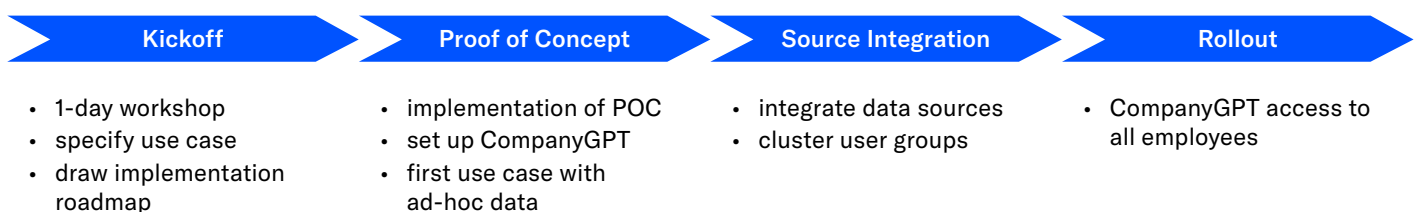

CompanyGPT on Azure complies with the most stringent privacy regulations, including the General Data Protection Regulation (GDPR), ensuring the protection of sensitive company information with role-based access control.

### Full API

Link all of your company knowledge to CompanyGPT, be knowledge management systems, Sharepoint, CRM, ERP or any other source.

## Ready to use in less than three days

Let's shape the future together!
