Data Platform with Azure Integration Services: 4-week Requirement & Fit-Gap Assessment

If you are looking to seamlessly integrate disparate systems and establish a robust & scalable data platform ensuring a solid foundation for your data-driven initiatives, CloudFronts can help.

Transform your organization's data landscape with our Data Platform with Azure Integration Services: 4-week Fit-Gap Assessment. This consultation is designed to help you analyze your data needs and align them with the capabilities of Azure Integration Services, ensuring a solid foundation for your data-driven initiatives.

Our team of Azure experts will collaborate closely with your organization to understand your unique data platform requirements and identify any gaps or areas for improvement. We will conduct a comprehensive analysis of your current data infrastructure, including data sources, storage systems, and integration processes.

AGENDA

- Comprehensive requirement-gathering sessions to understand your data platform needs.
- Thorough analysis of your current data infrastructure and processes.
- Identification of gaps and areas for improvement.
- Our proposed approach including change management and project methodologies.
- Recommendations for building an efficient data platform with Azure Integration Services.

DELIVERABLES

- High-level Project estimates and timelines.
- A formal presentation (ideally in person at your offices) to stakeholders.

By the end of our 4-week consultation, you will gain valuable insights into your data platform needs and a clear roadmap for leveraging Azure Integration Services.

CloudFronts is a premier Microsoft Partner with a proven track record of successful Azure implementations. Our head office and robust delivery center are based out of Mumbai, India, and branch offices in Singapore & U.S.
