

ERP Digital Transformation with Dynamics 365: 3-week Requirement & Fit-Gap Assessment

Whether you're looking to replace or modernize your current system, move to the cloud, or embark on a complete transformation, our experienced consultants at CloudFronts can help.

Our ERP Digital Transformation Assessment is a 1-week consultation designed to help you kickstart your next-generation ERP journey with Microsoft Dynamics 365. We'll work with you to assess your current system and provide a comprehensive Fit-Gap analysis of what needs to be done to streamline your business processes, reduce costs, and improve your bottom line.

Our team of experienced consultants will thoroughly analyse your ERP system, including assessing your current business processes and workflows, identifying key pain points and bottlenecks, and evaluating existing systems. We'll then provide you with a detailed report that outlines our findings and recommendations for a successful digital transformation.

AGENDA

- Document the current and future state of your processes.
- Our recommendations (from integrations to customizations to ERP platform recommendations).
- Our proposed approach including change management and project methodologies.
- A clear roadmap for your ERP digital transformation.

DELIVERABLES

- High-level Project estimates and timelines.
- A formal presentation (ideally in person at your offices) to stakeholders.

By the end of our 1-week consultation, you'll have a clear understanding of what needs to be done to take your ERP system to the next level.

CloudFronts is a premier ERP Transformation Microsoft Partner with a proven track record of successful ERP Digital Transformation across geographies and industries. In addition, our Microsoft Business Applications Solutions Partner Competency further establishes our expertise to deliver consistent customer success.
