

Cloudgainz: Azure Cost Optimization Services

Cloudgainz brings over 20 years of experience in IT cost management, enterprise architecture, and infrastructure operations to partner with you to reduce your monthly bill, meanwhile positioning your IT teams to accelerate overall comprehension and efficiency of your Azure platform.

Value Proposition

Discover

Discover and evaluate your architecture and current state. Define cost drivers towards optimization opportunities.

Analyze

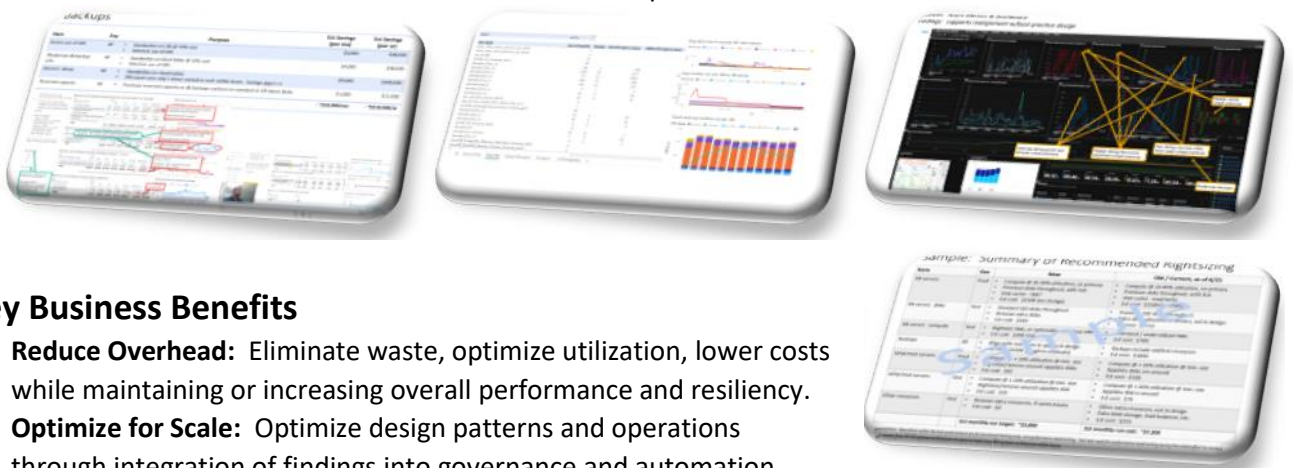

Compare and relate cost and discovery data to transform raw and technical information into consumable and actionable decisions. Identify “big” and “quick win” opportunities.

Optimize

Optimize your Azure environment to reduce underutilized resources and to consolidate duplicated costs. Find lower-cost options to achieve the same goals. Grow standards, policy, and governance to optimize at scale.

Monitor

Develop dashboards, views, and targets unique to your environment and areas of interest to visualize optimization success, variance, and new opportunities.

Key Business Benefits

- ✓ **Reduce Overhead:** Eliminate waste, optimize utilization, lower costs while maintaining or increasing overall performance and resiliency.
- ✓ **Optimize for Scale:** Optimize design patterns and operations through integration of findings into governance and automation.
- ✓ **First-time Success:** Increase first-time success for workloads migrating into Azure with predictable design patterns including the “best fit” selection of cloud resource types and tiers.
- ✓ **Accelerate:** Increase adoption and efficiencies through knowledge sharing and collaboration incorporating cost awareness into your business’s best practices.

Service Offerings

- **Cost optimization as a service:** Dedicated cloud cost management providing Azure spend read-outs, optimization opportunities, management of reserved instances, budget tracking, and deeper business insights relevant to your business.
- **Quick-pass cost optimization assessment:** Limited one-time engagement including a “quick pass” on your Azure bill targeting several “big” or “quick” win opportunities to save on average 15% or more on monthly spend.
