

Custom Baseline Security Assessment

Understand your readiness for common security threats

Engagement highlights

Identify a baseline of your organization's cybersecurity policies

Use Microsoft Security capabilities to generate an overview of areas of focus

Map baseline and security scan results to common threat scenarios

Develop joint plans and next steps

Human-operated Ransomware and data leaks from insider threats are two of the most prevalent security risks that organizations are facing. Over 98% of these attacks can be prevented by having basic security hygiene processes and solutions in place¹. How aware is your organization of the policies and activities that can help to strengthen your cybersecurity posture?

Improve your security awareness with a Cybersecurity Assessment

Organizations today are addressing security threats from numerous locations while having to work with multiple stakeholders both within and outside of their organization to maintain compliance with various industry and regional regulations. Get a jump start on improving your security posture, with Microsoft Security solutions, by scheduling a Cybersecurity Assessment.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. Gain awareness of the current state of your security aligned to industry benchmarks, and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

Why you should attend

This assessment is designed to help you understand the importance of security and how to protect your organization from potential threats. We will also discuss the latest security threats and your organization can stay aware and ahead of the curve. By attending this engagement, you can:

Engage in hands-on activities to help you gain an understanding of common threat scenarios

Walk away with actionable next steps grounded in industry accepted benchmarks

Get a documented status of organizational defenses against common threats

Better understand how to accelerate your security journey using the latest Microsoft Security tools

¹ Digital Defense Report 2022, Microsoft

What to expect:

During this assessment, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Insights into common cybersecurity threats and the impact they can have on business operations.
- Analysis of your organization's alignment to common cybersecurity goals and improvement actions designed to help strengthen your posture against human operated ransomware and data leaks from insider threats.
- Visibility into to your endpoint health and Microsoft 365 data using scans from Microsoft Security tools.
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.

Who should attend

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Chief Risk Officer (CRO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

Why CloudGate?

When it comes to security, you need an experienced partner.

One of CloudGate's distinguishing features is its deep expertise within the Microsoft ecosystem. They have a profound understanding of Microsoft's suite of products and services, including Azure, Microsoft 365, and more. This expertise allows them to tailor solutions that seamlessly integrate with Microsoft technologies, leveraging their full potential to drive efficiency, productivity, and innovation for their clients.
