

Data Security: 2-Days Workshop

Primary Product: Azure; **Pricing:** \$1,000.00

What is it?

Learn the basics of data security with our introductory workshop on how businesses are protecting themselves from online threats using the latest and best solutions on the market.

Who is this for?

We have designed this workshop for security stakeholders who want implement a thorough strategic plan based on Microsoft's best practices for safeguarding IT environments.

Data Security: 2-Days Workshop

Primary Product: Azure; **Pricing:** \$1,000.00

What are the benefits?

The sessions cover the contemporary cyber threat landscape and associated techniques for identifying and reducing possible threats. Other topics covered include:

- solutions based on Microsoft's all-encompassing approach to security
- local hybrid and multi cloud systems for both individual workstations and full server suites

Outcomes of the workshop

At the end of the workshop, your IT team will have a clear picture of the threats which are currently in the industry, the best Microsoft tools on the market and how companies are implementing them.

Steps and agenda:

We will address the session's scope and objective during the introduction and overview segment, which comes first in the workshop. This is followed by a presentation on how to assess your company's current setup. We will also present demos of:

- Threat Protection
- Microsoft 365 Compliance Manager
- Defender for Cloud Apps
- Azure AD Identity & Access Management
- Azure AD Connect
