

Introducing the Modern Workplace Assessment

Empower your business through reliable and expert tech services. Be sure of IT.

The Modern Workplace Assessment assists customers in simplifying cloud adoption and mitigating risk.

It gives customers visibility into their desktop and on-premise environments while also assisting them in increasing end-user productivity. [A cloud roadmap highlighting prioritized business applications for transition is among the deliverables.](#)

How we do it

Cloudica's Modern Workplace Assessment offers a methodical approach to assisting your company in its constant growth. The assessments employ an interactive and agile approach to gathering and preparing requirements, reviewing preparedness, planning and designing a basic solution, and allowing for early testing.

Core experts will collaborate with your internal teams and end-users to develop alignment, drive value, and assure desired outcomes in your organization.

What it involves

During the Modern Workplace Assessment, Cloudica analyzes your present working environment and makes suggestions to empower productive staff with the proper tools, apps, and services to enable secure and contemporary work styles.

Interviews

This step is important to understand your needs, goals and current bottlenecks. It helps us determine which tools are best suited for your current applications and requirements.

Education

The Assessment involves a short presentation on how Microsoft 365 can help your company be more efficient, cost-effective and business oriented.

Evaluation

We prepare a report on how you can streamline your operations based on tried-and-tested solutions learnt through years of experience in the field. Our methods have been proven to cut time, effort and cost.

What are the benefits of this assessment?

This one-day assessment is an excellent place to begin in terms of providing clear and practical insights into the commercial benefit of a successful Modern Workplace transition. It can benefit SMEs and larger businesses to grow with the resources they already have and invest in the elements that matter most – their workforce.

Improved productivity

Reduced costs

Enhanced user experience

So, get in touch today to see how we can help grow your business.
