2-day Workshop:

Modern Workplace

Microsoft 365 enables a safe and productive workforce

How can Microsoft 365 technologies be used to meet company objectives such as increased efficiency and productivity, as well as increased employee collaboration, connection, and engagement?

The Modern Workplace Workshop is the initial step, whether you are now utilizing or plan to utilize Microsoft 365 services and technologies. The Modern Workplace Workshop gives guidance for workplace digitalization by presenting a solid approach for effective adoption of proven collaboration technologies and demonstrating real business usage of Microsoft 365 solutions.

Latest developments in modern workplace

- A presentation on how companies are using technologies to increase efficiency
- Discussion on some of the trends affecting workplaces today
- Looking at successful case studies from the sector

Tools and their best uses

- A deep dive into the Microsoft tools that can help your business grow
- Suggestions of solutions to real-life problems faced by companies today
- Tips and tricks of how to fully utilize Microsoft 365 tools

Real-life examples from practice, in three areas

Teamwork
Microsoft Teams

Organizational culture
Digital Workplace

Business processes
Power Apps, Flow & Power BI

We place significant emphasis on our Digital Advisory approach, which guarantees that the goals of digitization of the work environment are determined and the cooperation process is completed in the best possible way, with a clear focus on actual use scenarios that are applicable to all sectors.

Microsoft 365 tools we work with during the workshop:

Who did we design this workshop for?

This workshop is aimed at all medium and large businesses in all industries interested in learning more about current collaboration technologies for centralized virtual communication of employees and teams. It is also useful for anybody interested in learning how to handle company material, paperwork, and procedures more efficiently.

About Cloudica

Cloudica is all about technology experts you can rely on to empower your business and co-create value for it. We ensure that you'll be tech-driven, data-aware, cost-effective, and safe-first by combining Azure, Microsoft 365, Security, and other complementary IT services.

We pride ourselves on our high level of professionalism, while still remaining adaptive and customer-oriented, understanding the business needs of all key industries. Above all, we value trustworthy, long-term relations with both clients and experts around the world. Cloudica, be sure of IT

So, get in touch today to see how we can help grow your business.
