

Microsoft Azure Infrastructure: 2-Days Workshop

Primary Product: Azure; **Pricing:** \$1,000.00

What is it?

Cloudica's two-day Microsoft Azure Infrastructure workshop is an overview of the basics involved in planning, deploying and maintaining an efficient Cloud computing infrastructure.

Who is this for?

This workshop is designed for IT teams of medium-sized companies and larger corporations who are planning on expanding their cloud computing capabilities and want to know how to choose and then maintain a Microsoft Azure computing system based on Microsoft solutions.

Microsoft Azure Infrastructure: 2-Days Workshop

Primary Product: Azure; **Pricing:** \$1,000.00

What do we offer?

We offer a comprehensive overview of the latest Microsoft tools to plan, deploy and maintain a cloud infrastructure that is:

- Secure
- Flexible
- Expandable
- User friendly
- Adaptable

What are the benefits?

Cloudica taps into our 15 years of experience in rolling out cloud solutions for a wide range of clients in numerous industries including finance, medical, manufacturing and utilities. We know the best way of creating the most efficient cloud solutions. In this workshop, we have condensed our knowledge to provide professionals with the essentials to manage the development of a cloud solution that exactly matches their needs.

Steps and agenda:

- A deep dive on the Microsoft-Azure based cloud infrastructure solutions
- A presentation on the best practices used by companies today to develop a solid and safe infrastructure
- An outline on how to best manage a successful development.
- A presentation on the basics of how to maintain a working cloud infrastructure
- Q&A session
