

Migration to Microsoft Intune: 5-Weeks Implementation

Primary Product: Azure

What is it?

Cloudica's service helps organizations migrate their existing IT infrastructure to Microsoft's cloud-based platform, Microsoft Intune.

Who is this service for?

This service is intended for organizations that want to improve their IT infrastructure by taking advantage of Microsoft Intune's cloud-based features. This includes organizations that want to reduce the cost and complexity of their IT systems, as well as those that are seeking to increase the security, scalability, and flexibility of their IT environment.

Migration to Microsoft Intune: 5-Weeks Implementation

Primary Product: Azure

What are the benefits?

These include:

- Reduced cost and complexity of IT systems
- Increased scalability and flexibility of IT environment
- Improved security of IT systems
- Streamlined access and management of data
- Improved user experience

Outcomes of the implementation:

At the end of the five-week implementation period, organizations should expect to have a fully functional, Microsoft Intune-based IT infrastructure with improved security, scalability, and flexibility.

This five-week implementation provides the necessary guidance and support to ensure a successful migration to Intune. At the end of the five weeks, your organization will have a fully running Microsoft Intune platform.

Migration to Microsoft Intune: 5-Weeks Implementation

Primary Product: Azure

Steps and agenda:

Week 1:

Week 1: Planning and Design

- Identify existing IT infrastructure
- Analyze current IT environment
- Plan and design Intune migration

Week 4:

Training

- Train IT staff on Microsoft Intune
- Train users

Week 2:

Implementation

- Install Microsoft Intune
- Configure Microsoft Intune
- Test Intune

Week 5:

Finalization

- Finalize Microsoft Intune setup
- Resolve any outstanding issues
- Final review and sign-off

Week 3:

Migration

- Migrate existing data to Microsoft Intune
- Test the migration
