CONTROL
ADVANCED CONNECTED SOLUTIONS

Use Cloud Maker's intuitive visual interface to rapidly design, configure, and deploy Azure cloud solutions - no code required.

Drag & drop Azure cloud services onto the Cloud Maker drawing surface, be guided by the Cloud Maker AI, and rapidly build Azure cloud solutions faster than ever before - all without having to write a single line of Infrastructure-as-Code (IaC).

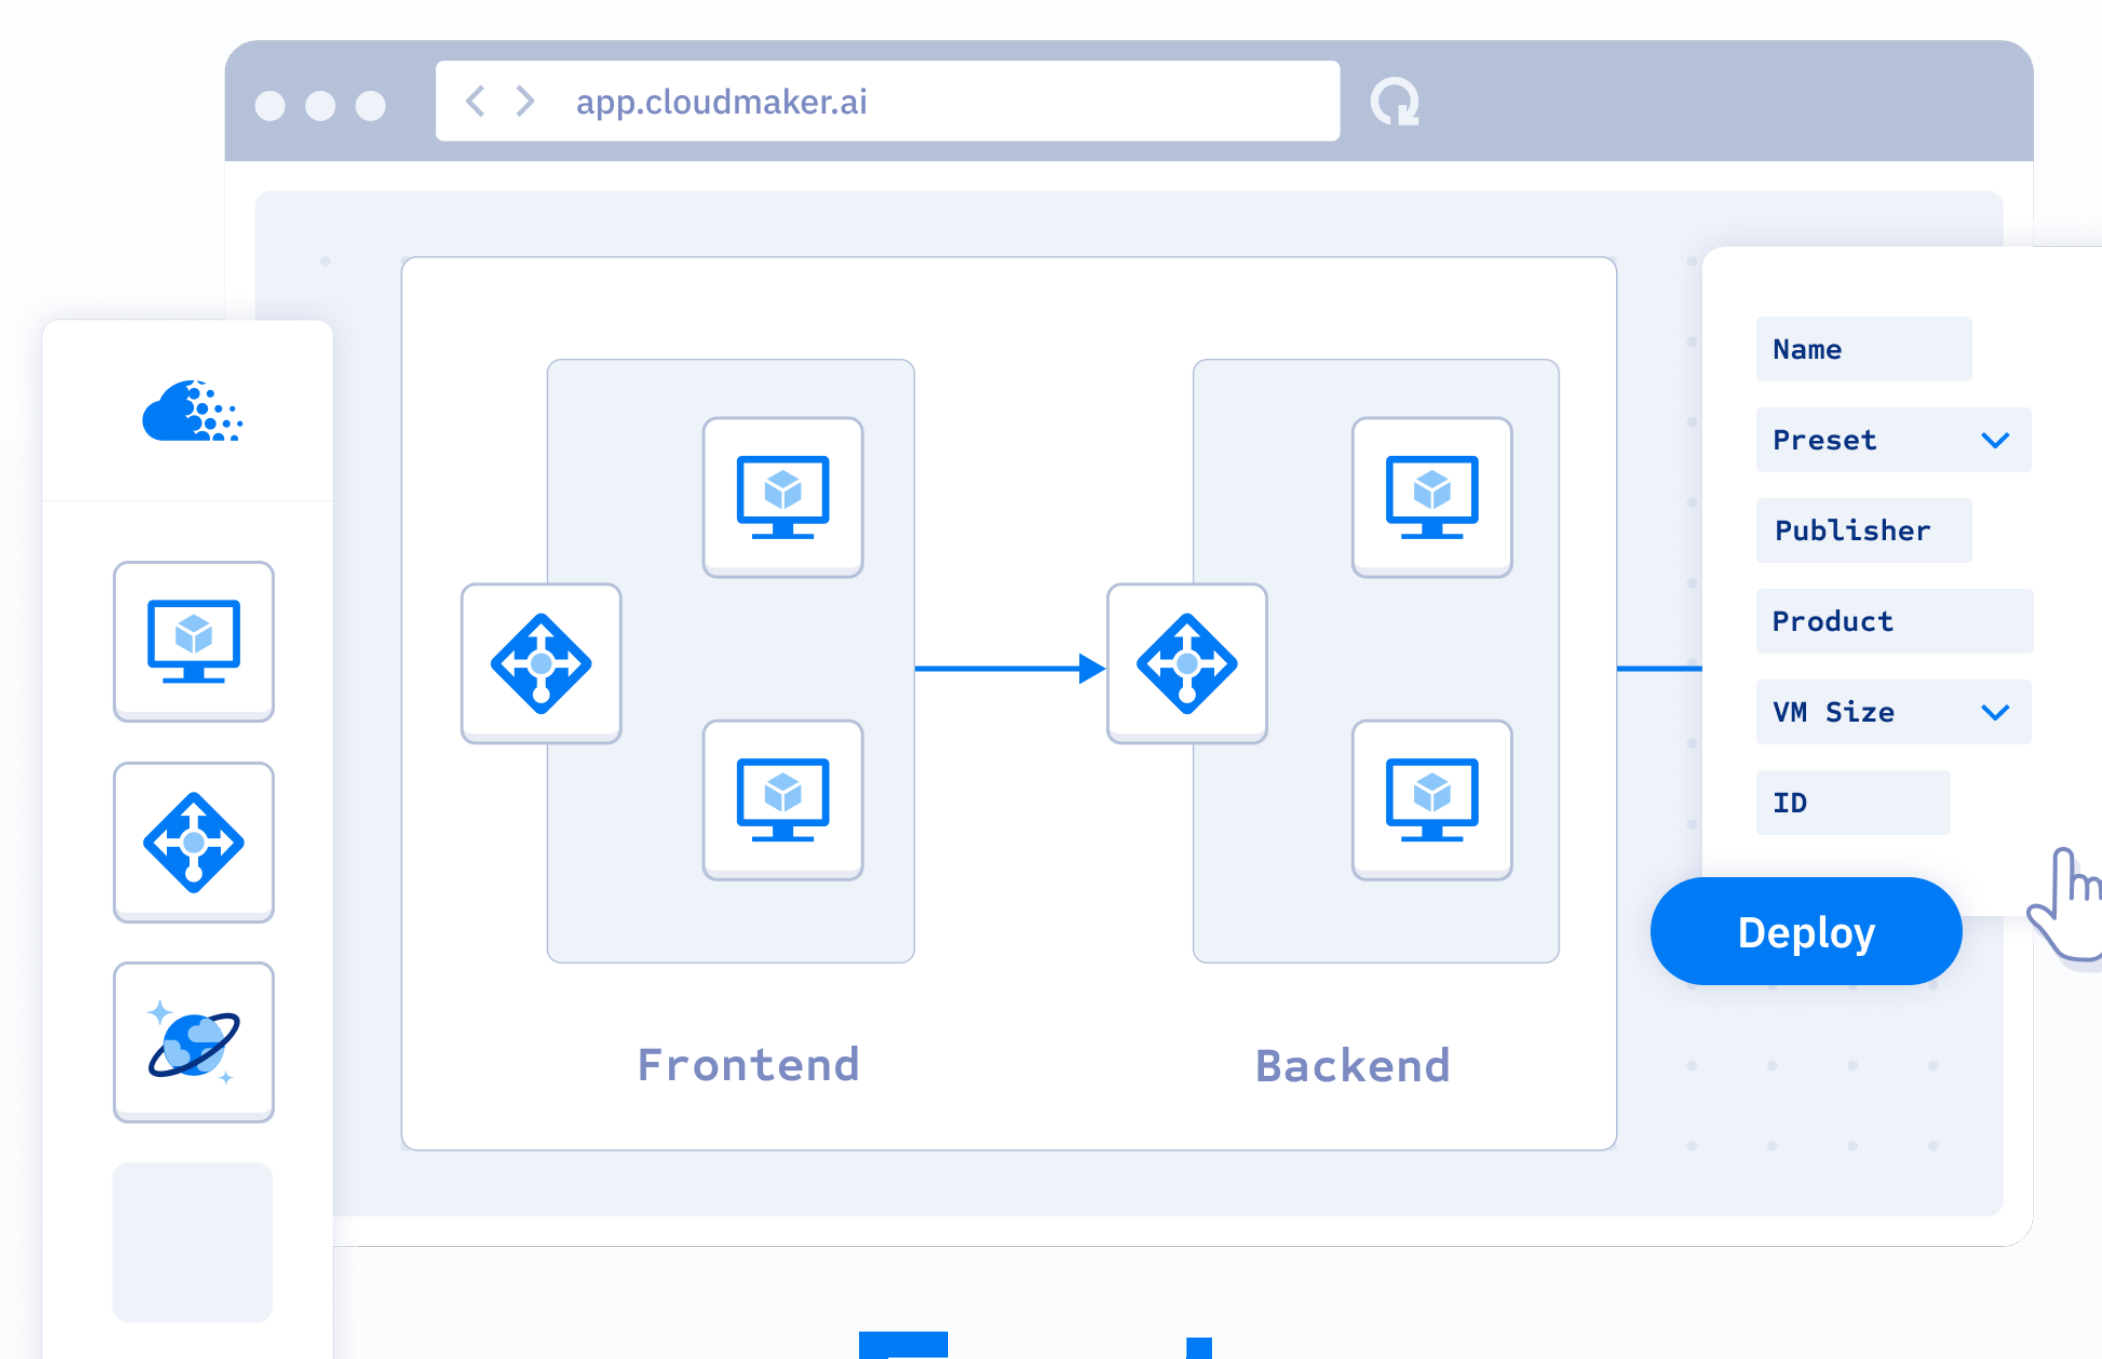

Control IO is a cutting-edge motorsport telematics company that needed a next generation, highly scalable telematics platform using Azure. With little IaC experience, they used Cloud Maker to go from 0 to Azure in record time.

Key Benefits

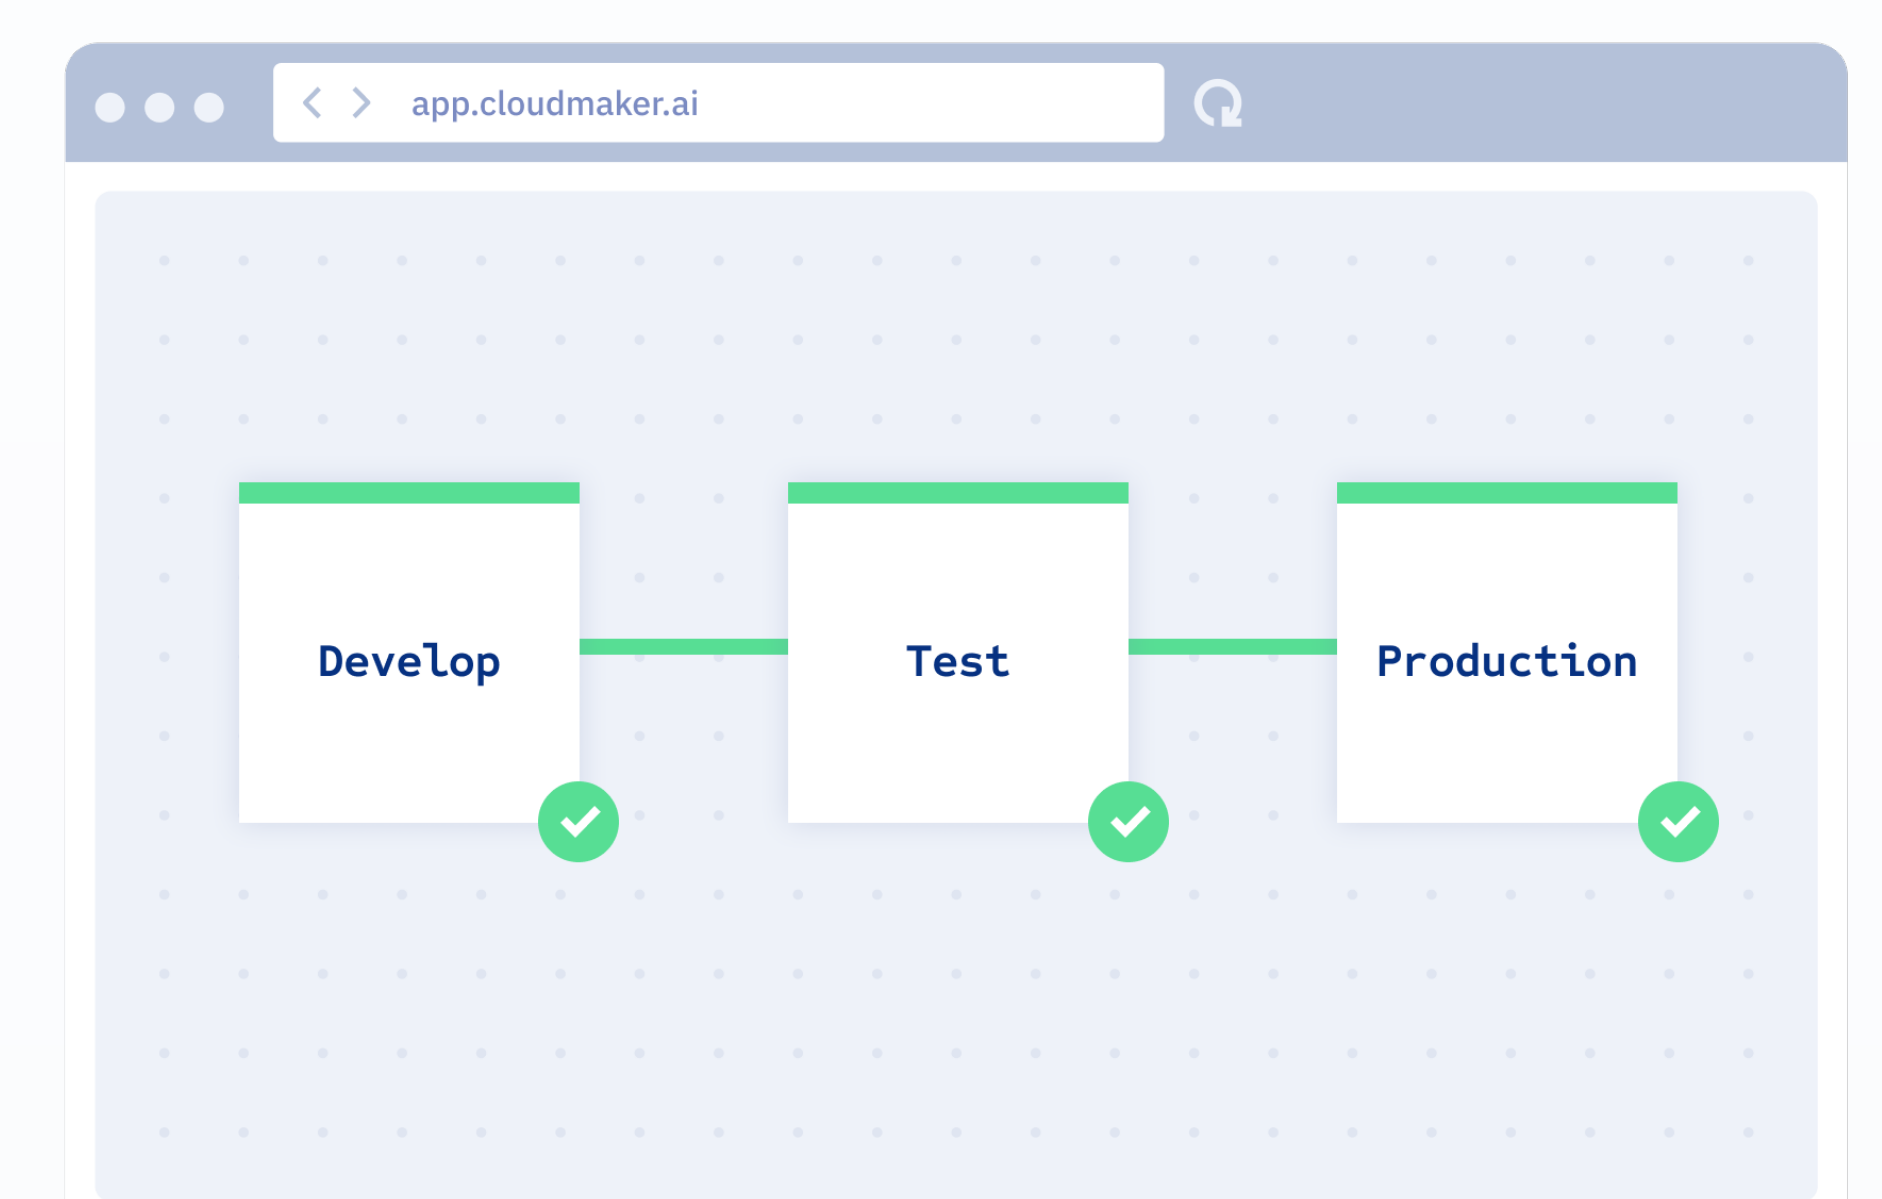

Easy

Draw your cloud solution rather than coding it

Fast

Configure your Azure solution visually, no code needed!

Scaleable

Deploy your solution to the cloud automatically. Cloud Maker does the heavy lifting!

Features

Azure Diagrams

Create comprehensive Azure solution design diagrams quickly & easily

Blueprints

Store your diagrams as blueprints that can be deployed to the cloud

CI/CD Integration

Integrate seamlessly with Azure DevOps to enable full CI/CD integration

Team Members

Collaborate with other team members on Azure solution designs

Export to PNG & SVG

Export to popular image formats for use in technical documentation or presentations

Visual Version Control

View version history and roll back to older design versions when required

AI Suggestions

Use Cloud Maker AI suggestions to help you design your Azure solution

Azure Configuration & Deployments

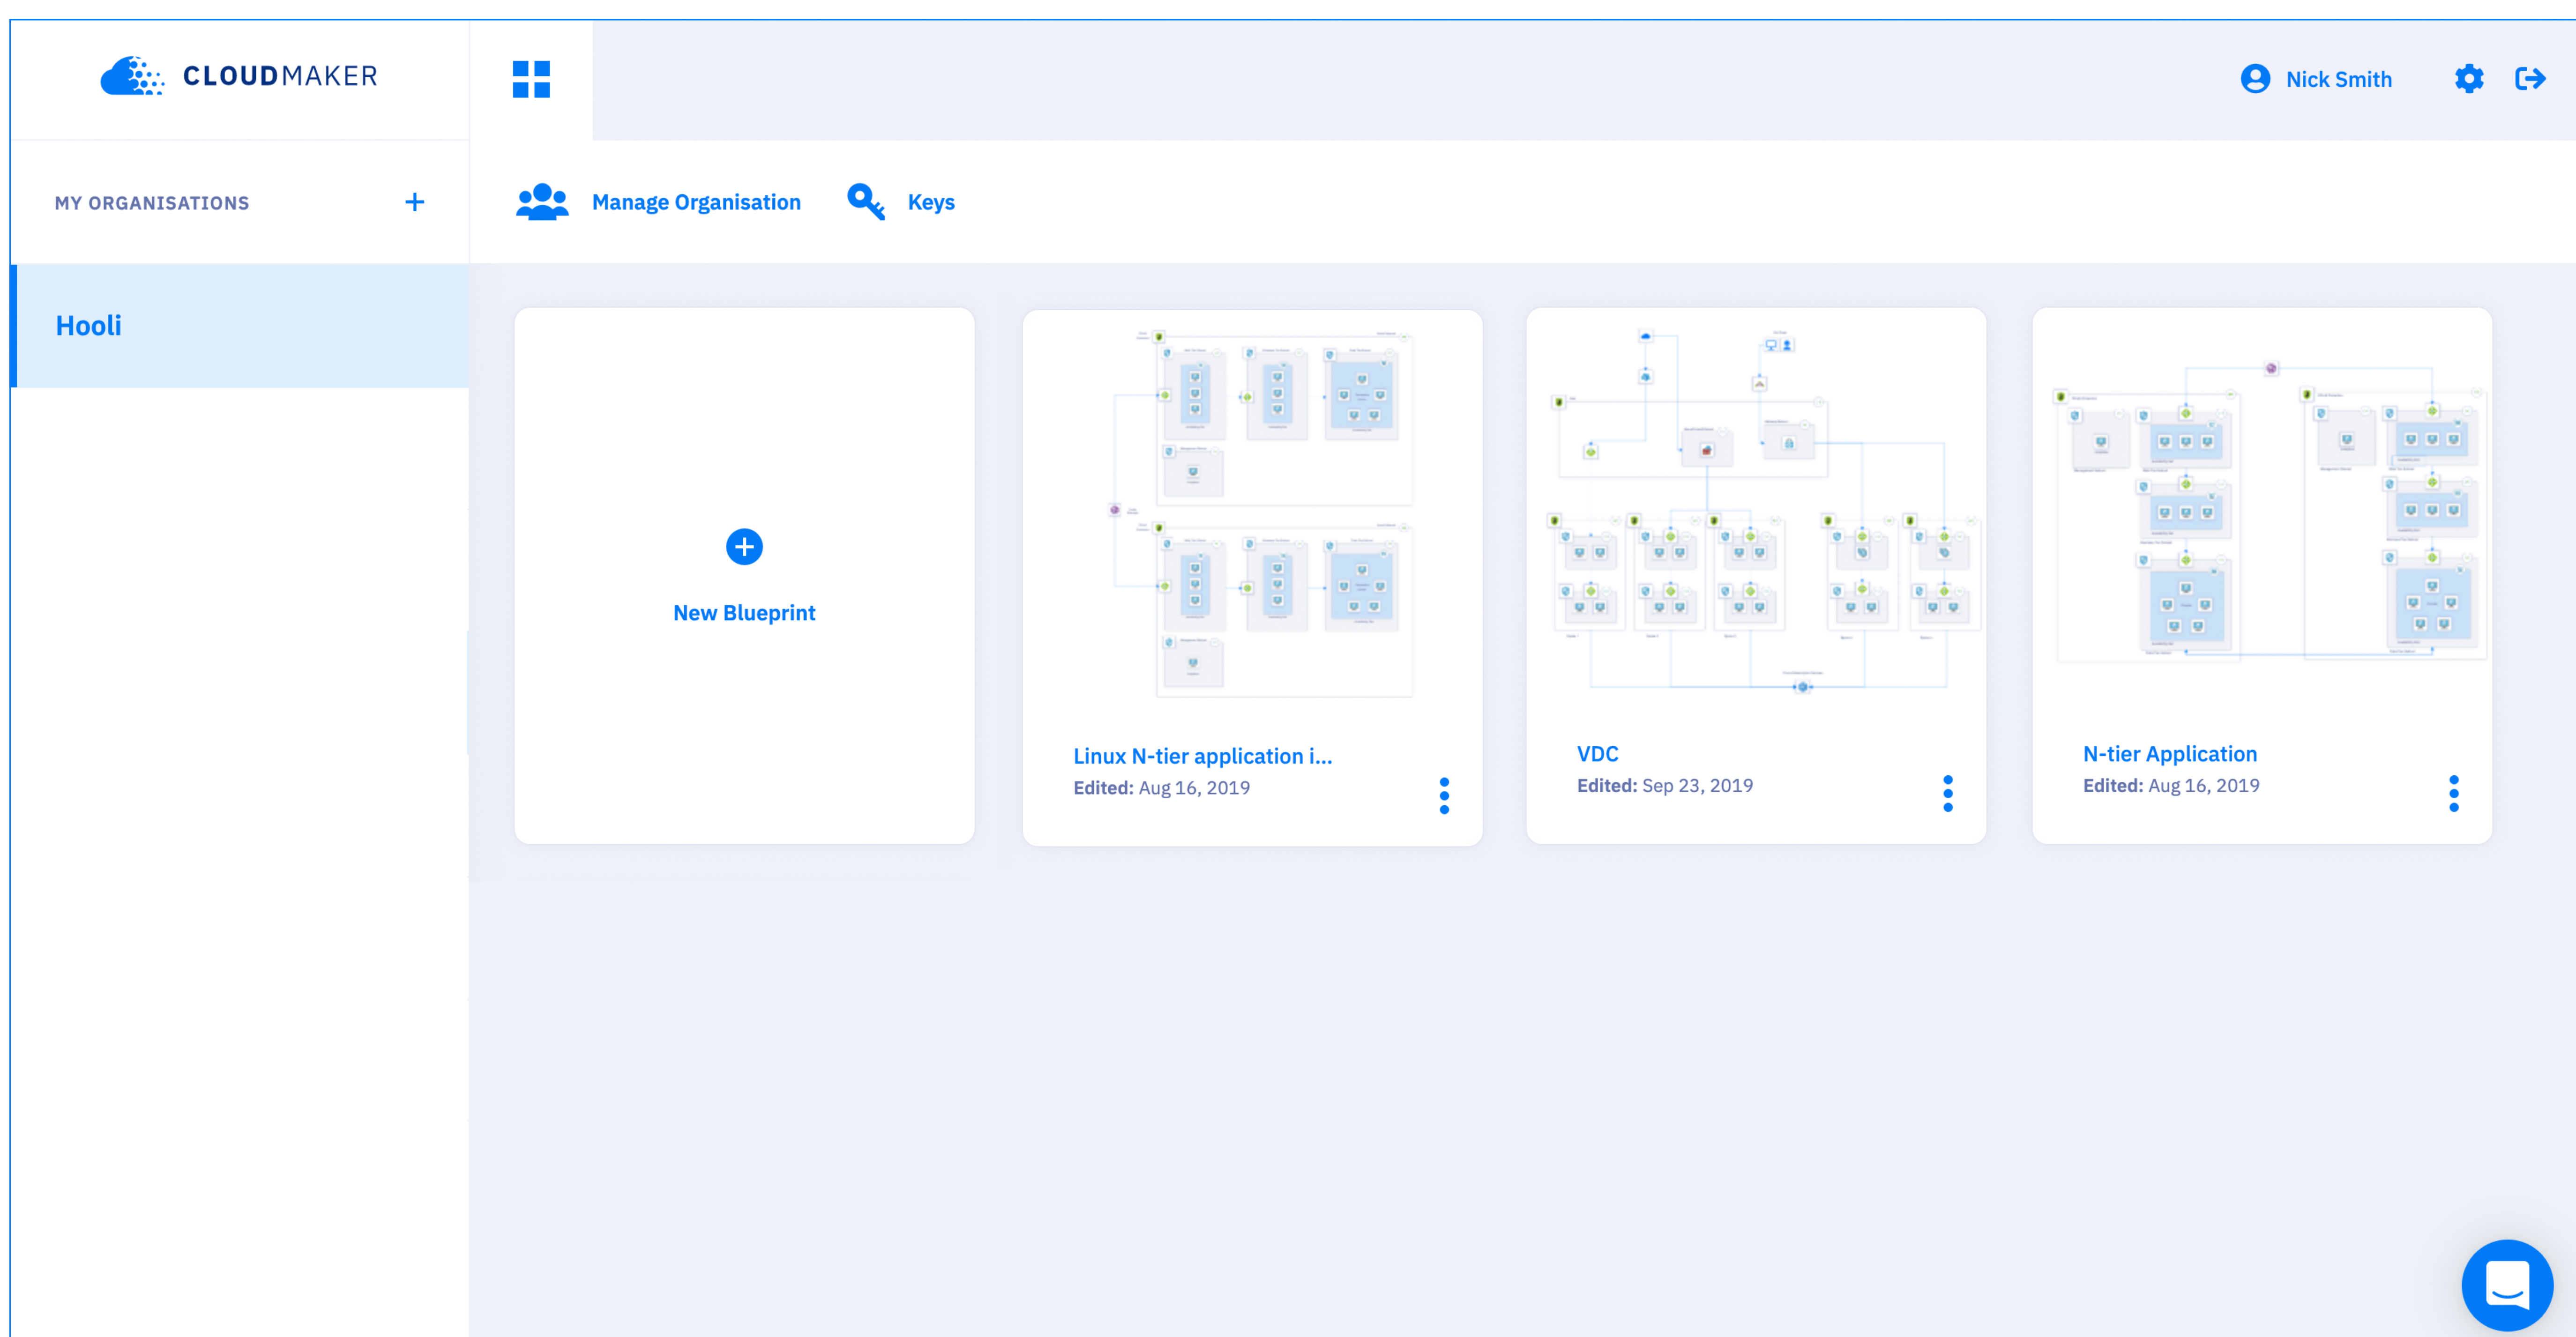

Configure your diagrams and deploy them directly to the cloud, no code required!

Enterprise Support

Enterprise support to ensure you always have help when you need it!

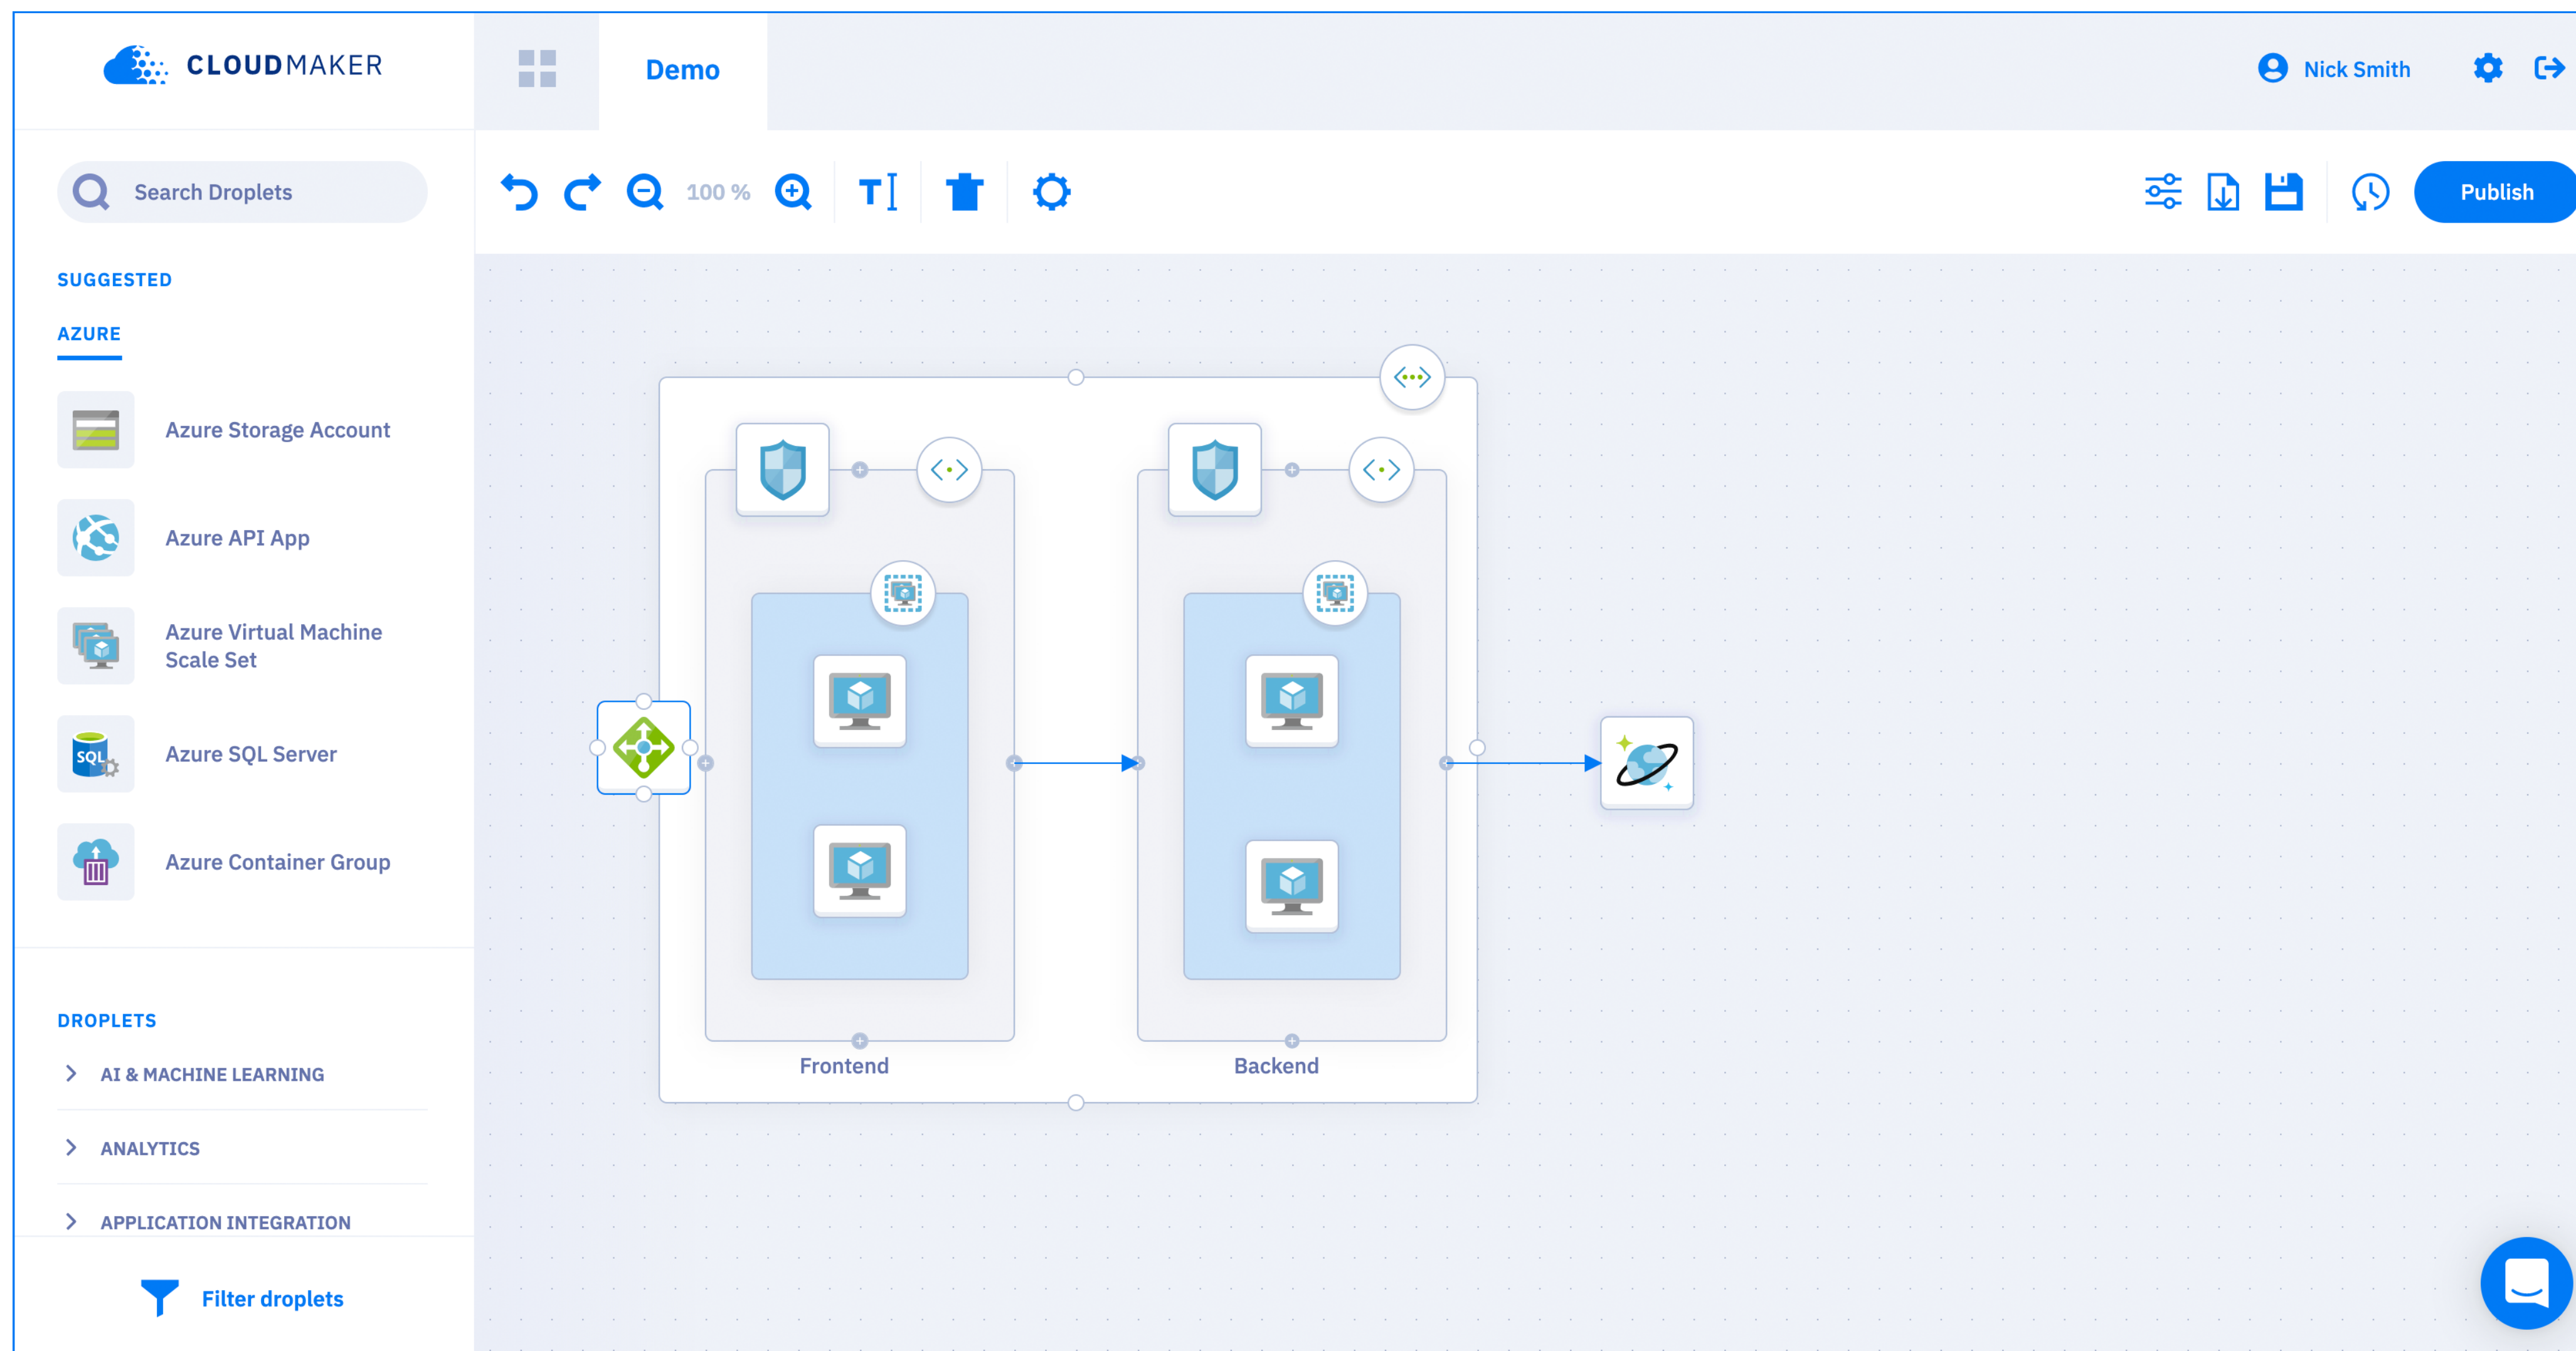

Create an Azure Solution in 4 Easy Steps

- 1** Pick a default blueprint from Cloud Maker, an existing one your team has created, or if you prefer start from a blank sheet of paper!

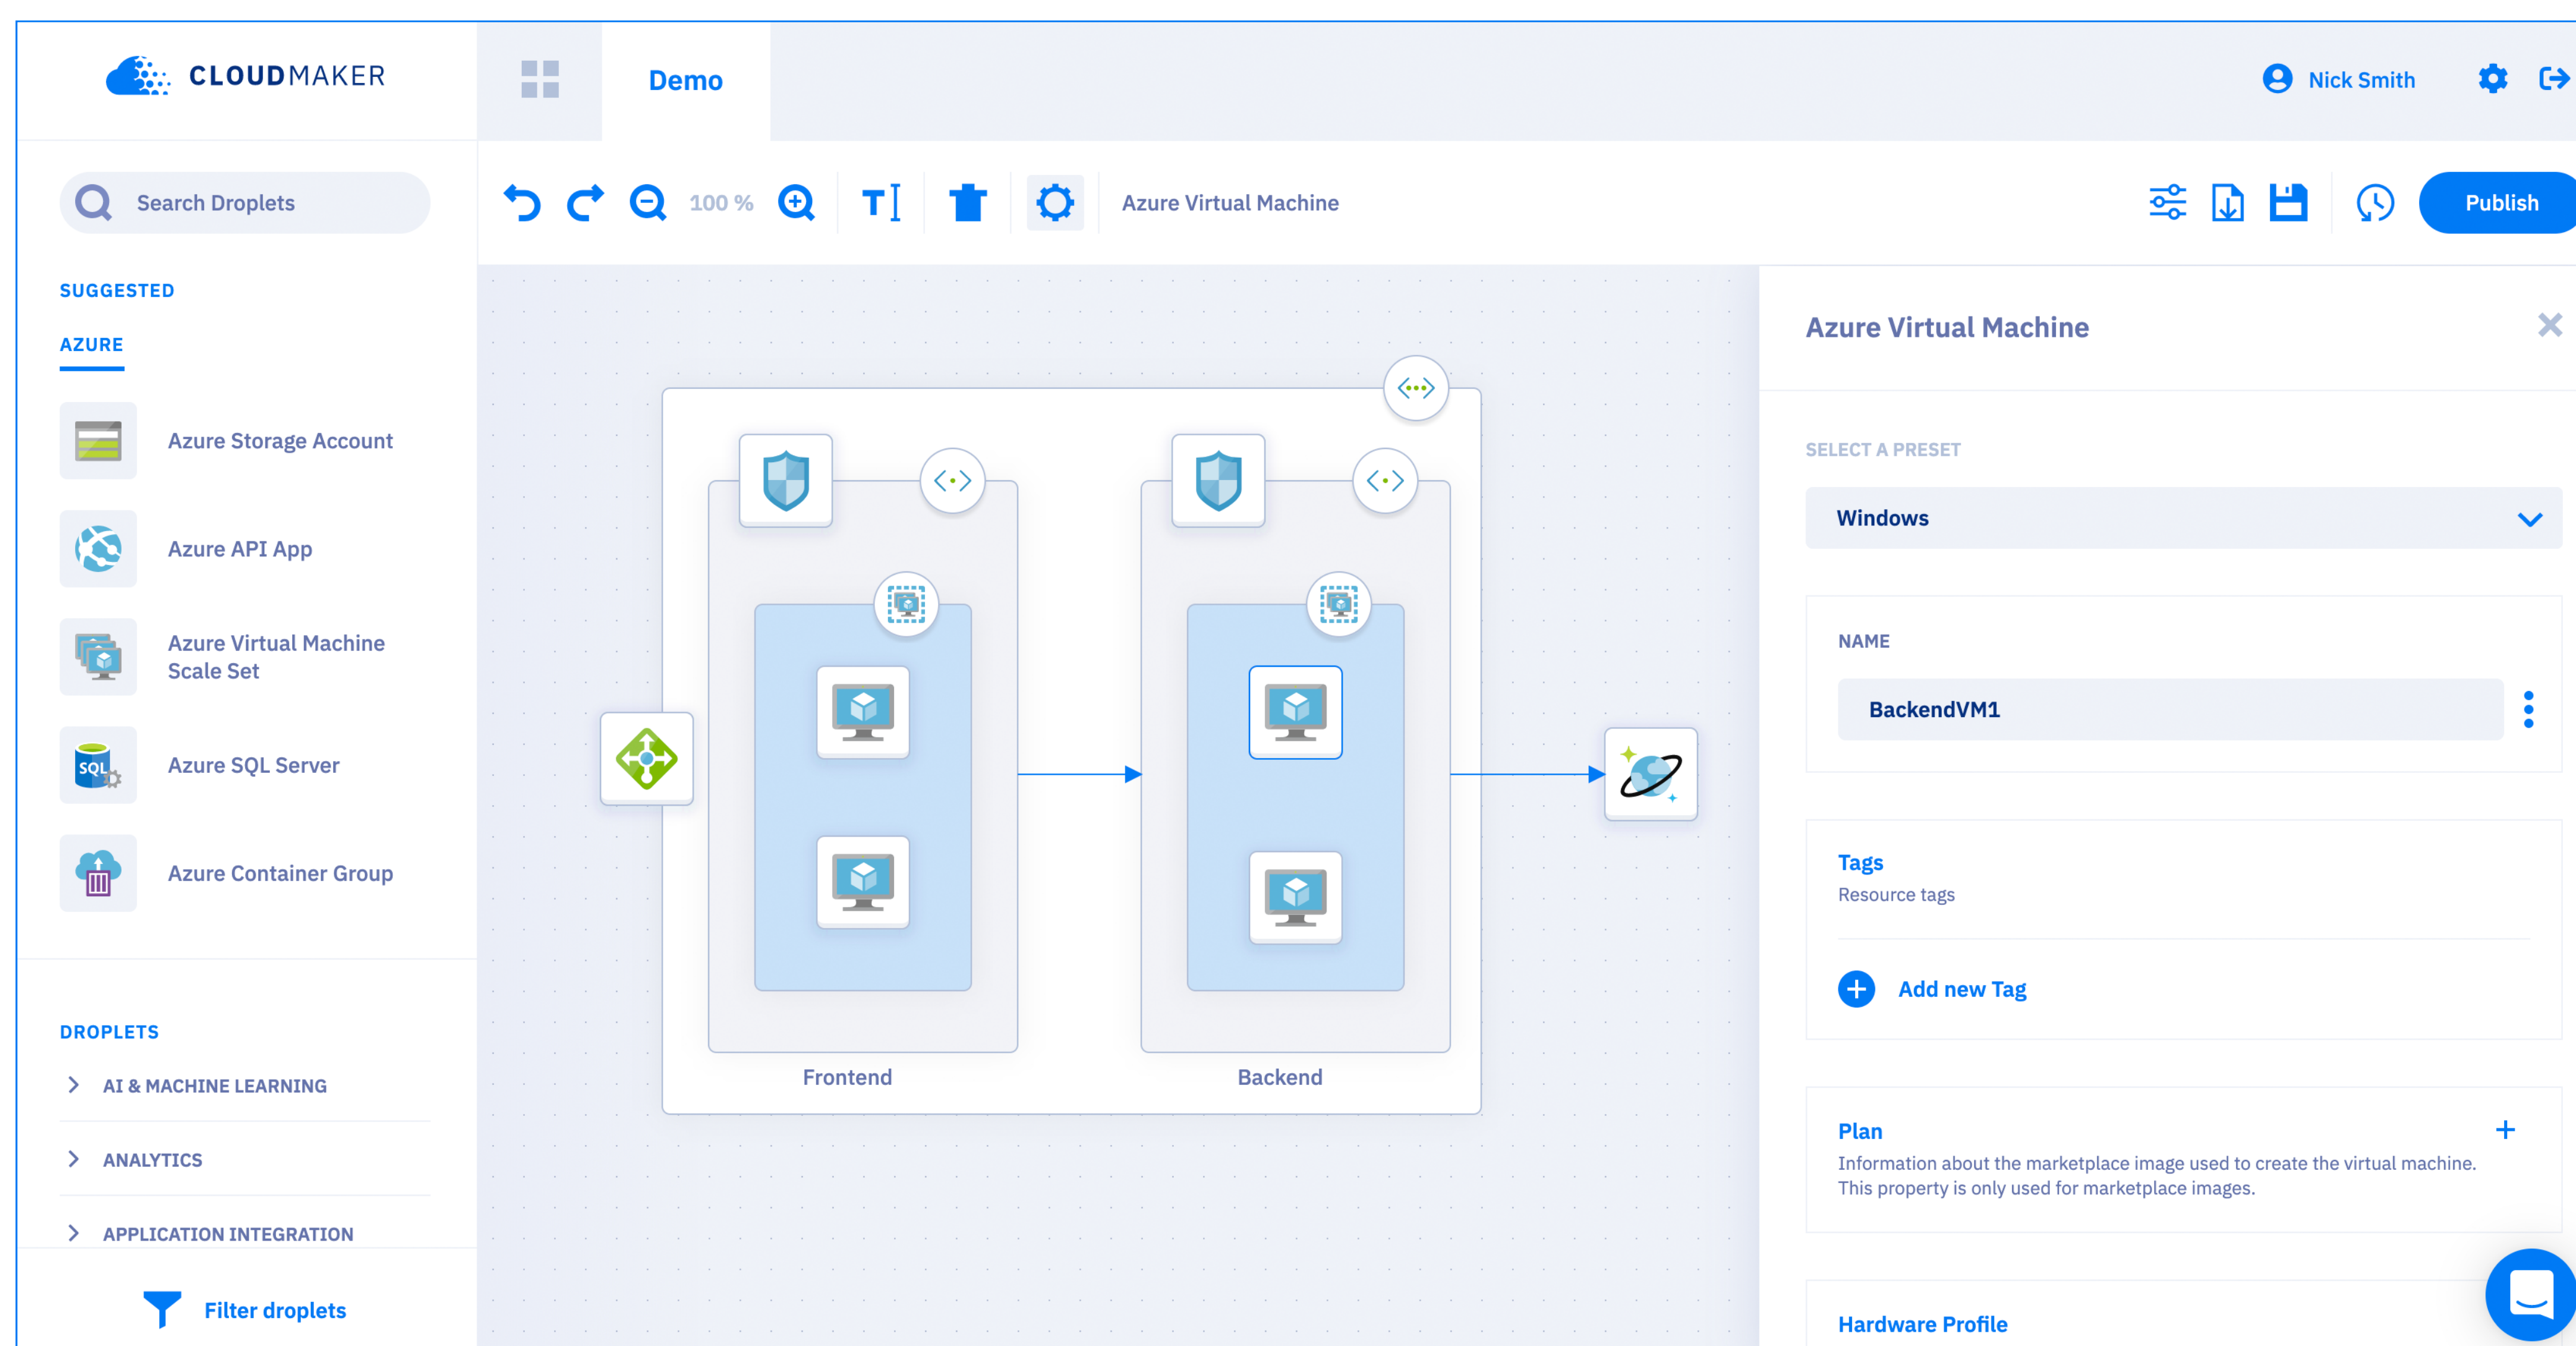

2

Drag and drop Azure services onto the Cloud Maker drawing surface. The Cloud Maker AI will suggest services for you and guide you to a valid solution.

3

Configure your design with an easy to use graphical user interface. The Cloud Maker validation engine helps ensure you have set all the correct settings for your solution.

4

When you're ready, deploy your solution to Azure with the click of a button using Cloud Maker's built in deployment engine. **Using Azure DevOps?** No worries we've got you covered with our seamless integration!
