# SME BOOST

A Peak Performance Solution  
for any business looking to  
accelerate growth.

# Boost Your Remote Productivity

SME Boost creates a smooth working experience by giving you productivity boosting tools to manage remote teams, communicate and share sensitive data securely, manage time and collaborate on tasks, helping your team stay focused on goals, projects and hitting deadlines.

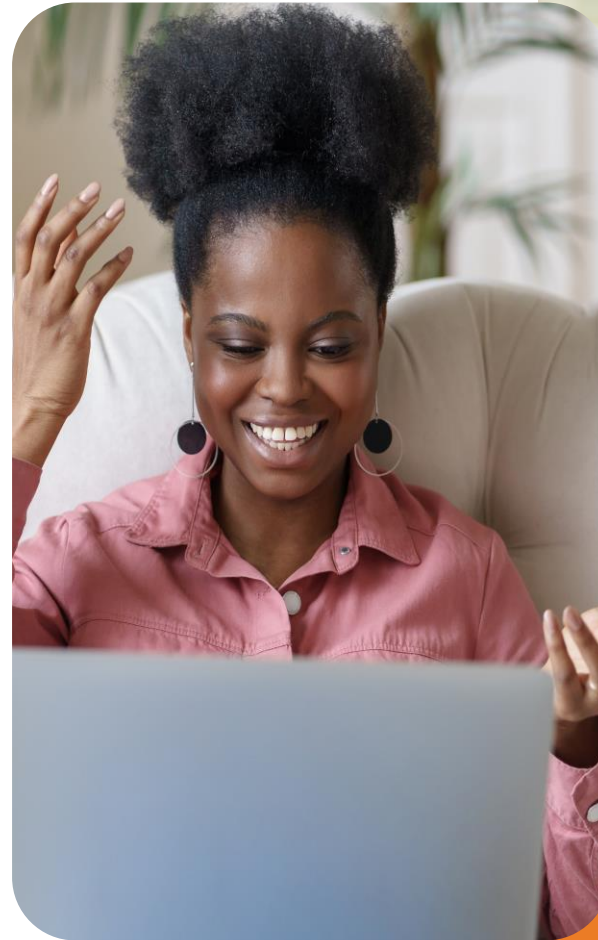

# Connect and Work Together Anywhere

SME boost combines the best Office apps, powerful cloud services, HD video conferencing and meetings and advanced project management with robust security that protects your business data against advanced cyber threats, Malware and Phishing.

# Get together with your team On-the-go.

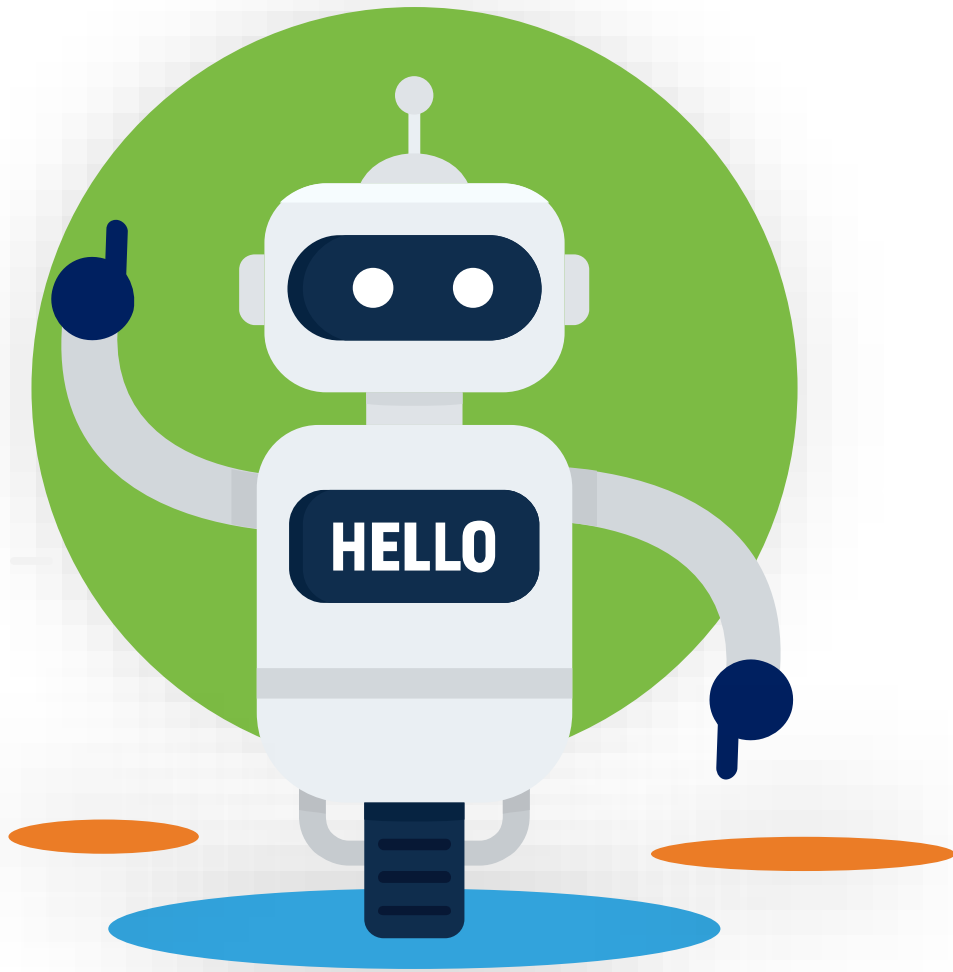

With the connectivity, collaboration, and team management tools in SME Boost, you can hold meetings with your team, clients, vendors, or partners in real time, share your calendar, access data, documents, and files remotely, assign tasks or review documents easily and securely.

# Work better, Collaborate, Coordinate flawlessly

With interchangeable product solutions, you can Enhance and Streamline workflows by Customizing solutions that fit specific teams, individuals, or departments easily and efficiently.

## **Protect your business data with seamless remote control and security.**

SME Boost has Inbuilt A.I. tools and protocols that will protect your business, devices, and data from advanced software threats like viruses, malware, and spyware.

Create protected workspaces, encrypted document repositories and presentation platforms that allow multiple teams to securely share, edit and present sensitive data in real time and from anywhere on the globe.

With Realtime document backups and file sync, your data is always safe minimizing downtime in the event of an attack or accidental data loss.

# Maximize your profits, As you stay cost effective

SME Boost contributes to business efficiency through enhanced collaboration by teams even over great distances using video conferencing and secure remote document sharing.

Specialized Productivity tools like OneDrive, SharePoint, Teams and the office suite minimize decision making bottlenecks, giving your business greater flexibility and agility which leads to reduced overheads, minimizing your expenditure and maximizing that all important bottom line.

# Engage, Integrate, and Automate.

SME Boost is designed to help you achieve more by giving your business real time communication, collaboration and protection that enhances your productivity.

- 

## **Connect, Communicate, and Make Sales Online.**

SME Boost includes reliable and secure website hosting. You can host your website on Azure at no additional cost.

In case you don't have a website, you can build a modern website using AI-powered templates that provide recommendations based on your industry and get exposed to your target audience.

With an e-commerce enabled website, you can reduce the customer funnel for your leads leading to more sales. That is because all the information is readily available for the lead to decide and through one-click checkout.

# Scenario 1: Save Time with easier file access

Small business owners spend more than 33 hours a month on administrative tasks, time that could be better spent on more valuable activities such as sales and business development (CA Today, May 2016.)

OneDrive for Business cuts down on wasted time by making file access quick and easy. You can share files and collaborate on documents with anyone, inside or outside your organization. With 1TB of storage, there's plenty of room for your files. You can search files and folders across any device, from anywhere.

Looking for an earlier version of the file? Right-click on the file name for a history of up to 25 versions.

## Scenario 2: Save Money with dedicated break & fix SLA

It is not uncommon for a small business to try and cut costs wherever they can to keep overhead low. One of the ways of doing this is by calling for IT only when something goes wrong, threatening profit-making. This might seem cost-effective but holding off on repairs might lead to higher costs and severe downtime for your business.

SME Boost provides a dedicated break-fix SLA for businesses of any size at no additional cost. As soon as you notice an app or tool is not working well, you can reach out to us, and we will be able to assist in the shortest time possible. We have a dedicated and professional IT team ready to help you.

# Productivity, packaged for you!

Whether you and your team are working remotely or onsite, SME Boost gives you the predictability and flexibility you need for your business through our easy “pay as you grow” service. The options allow you to only use the services you need while adding value to your business.
