

Hybrid Windows for a hybrid world of work. Welcome to your Windows 365 cloud PC.

Today's workforce is distributed and elastic

**2X**

The percentage of people working from home will double in 2021.*

**61%**

of employees use personal devices for work.**

**80%**

of employees want to work from home at least some of the time.²

Users want technology that is familiar, easy to use, and always available so they can work and create fluidly across devices and locations.

IT needs solutions that can be implemented easily and managed using familiar tools.

Introducing Windows 365 the worlds first cloud PC

Windows 365 fuses the scalability and security of the cloud and the familiarity of a PC into one seamless experience.

Securely access your Windows—including your desktop, apps, processing power, storage, and more—on any Windows, MacOS, iOS, or Android device, anytime, anywhere.*

Windows 365 is available in a range of configurations to suite a variety of needs, from simple task-based operations, to mainstream information worker needs, to demanding GPU-based workloads.

Windows 365 simplifies IT administration. Deploy, manage, and decommission cloud PCs with familiar Microsoft Endpoint Manager (MEM) tools. Manage the computing lifecycle of a cloud PC with the same tools used to manage a physical device.
